

## 2269324 - Compatibility Scope Matrix for SAP S/4HANA

Component: XX-SER-REL (Miscellaneous > Service Messages > Business Suite and SAP S/4HANA Release Information), Version: 83, Released On: 08.03.2024

### Symptom

Through the Compatibility Packages (CP) listed in the attachment "Compatibility Scope Matrix", SAP provides a limited use right to SAP S/4HANA on-premise customers to run certain classic SAP ERP solutions on their SAP S/4HANA installation. Condition is that these customers have licensed the applicable solutions as set forth in their License Agreements. Compatibility Pack use rights may apply to selected private cloud deployments as well, without the prerequisite of an on-premise classic license. Please refer to the respective Service Description Guide for details.

This use right expires on Dec 31, 2025, and is available to installed-base as well as net-new customers.

The announcement about the extension of maintenance for Business Suite solutions has no influence on the end of compatibility pack use rights - they will be terminated after 2025.<sup>(1)</sup>

Besides reading the attached documents, SAP recommends the latest SAP Community webinar on the topic: <https://www.youtube.com/live/muPrV5J7ffM>

### Other Terms

SAP S/4HANA Compatibility Scope Matrix, Way Forward

### Solution

In the "Attachments" section, the "Overview Presentation" and "Detail FAQ" documents explain the "why", "what" and "how" of CPs. For functional details, please also refer to the Feature Scope Description (FSD) of SAP S/4HANA, latest version (or through <http://help.sap.com/s4hana>), chapter 5.

The "Way Forward" presentation and overview list, also under "Attachments", provide information about solution alternatives in the perpetual scope of SAP S/4HANA. They describe the status of each Compatibility Pack and provide links to more detailed information about its strategy. This information is provided via SAP standard documentation, such as the Roadmaps and the Innovation Discovery. The "Item ID" helps to cross-reference between the original, descriptive CP matrix and the future-oriented "Way Forward" spreadsheet.

This blog <https://blogs.sap.com/2022/08/09/compatibility-scope-what-happens-after-2025-2030/> provides more details about the procedure for Compatibility Packs after their use right expiry in 2025/2030.

SAP is planning regular updates of the attachments. All forward-looking information is non-binding and with preview character. The released SAP Roadmaps are the proper source of information.

For questions and feedback about this note and its content, please create a customer message on component XX-SER-REL with the prefix 'CompScope'.

(1) In the exceptional cases of CS, LE-TRA and PP-PI, the usage right to their respective compatibility pack items (cf. matrix) terminates at the end of 2030.
