Thank you Ihab, John, Julien and teams for the alignment.

This positions us to take a significant step forward in simplifying our logistics landscape and building a more connected, scalable foundation for carrier collaboration across Syensqo. We will work to ensure the transition with carriers is managed effectively.

Kind regards

Francine

Subject: Approval Request – KDD062: Integration with Transportation Providers

Dear GBU Heads of Supply Chain,

I am writing to request your approval for the updated KDD062— Integration with Transportation Providers.

This KDD was previously approved and has now been updated to reflect the aligned direction across the SyWay program, in particular:

- Confirmation of SAP BN4L as the global standard platform for carrier integration
- Retirement of Transwide as part of landscape simplification
- Alignment with the BluJay replacement direction, ensuring consistency across regions and workstreams

Recommendation:

Retire Transwide and adopt SAP Business Network for Logistics (BN4L) as the standard platform for carrier and freight forwarder integration. BN4L will be deployed in EMEA where Transwide is currently used and extended globally where no integration platform exists. The full scope of BN4L capabilities will be leveraged, including tendering, dock appointment scheduling, carrier invoicing, and dispute management.

This updated version has been shared and aligned with your teams.

Requested action:

Please confirm your approval by reply.

If you have any questions or would like a short walkthrough, I would be happy to arrange.

Kind regards,
Francine

Hi Francine,

Approved for P&C.

In Europe, it will be important to ensure that BN4L is not a downgrade vs Transwide, and that we set the right process/organization for change management with our carriers.
