I am okay with the document, Sascha.

I doubt the CU calculation, but when reading the related document, I can see nothing wrong with it either. You even compared with other companies. Hence I have nothing my doubt can be based on and it remains a feeling only. Regarding BDC, I guess we will switch end of 2026. As you said, things will change then a bit, but mostly on the integration side - getting data in and out of DSP. Which is just a small part of the entire document. So no complaints or requests either.

Hello all,

I would like to present for your review and endorsement the following SyWay Detailed Design deliverable:

Application Architecture Design for SAP Datasphere - <https://wiki.syensqo.com/x/RixUO>

This has been endorsed by the SyWay Design Authority and is thus presented to you as stakeholders in its content for review and endorsement.

Please feel free to forward the links above to anyone else whom you would like to review. They may need to request access, but I will grant that as soon as the requests are raised in Confluence.

In order to meet PMO timelines, I would appreciate it if you could please provide feedback and/or endorsement by COB Friday 12 December.

Please feel free to comment directly in the document or contact Ian and Robert who authored the content.

Many thanks in advance!

Sascha
