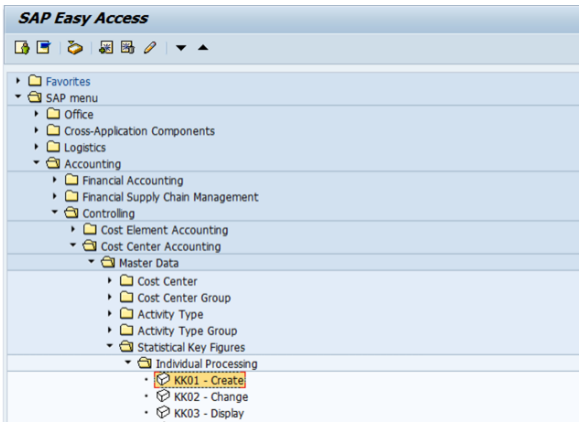
**Guideline**

I am informed that a statistical key figure needs to be created

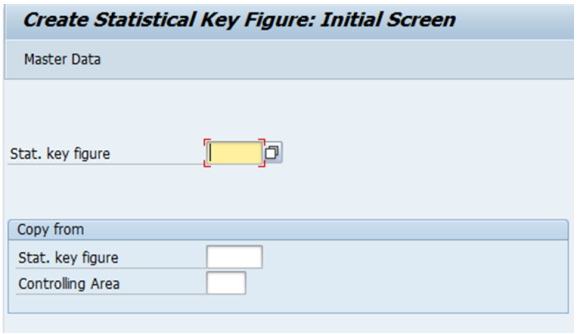
STEP 1

**Start the transaction using the menu path or transaction code KK01**

Double-click 

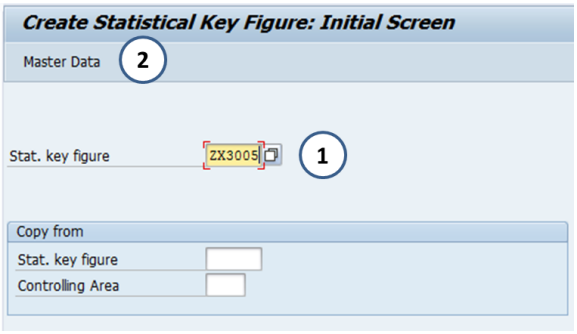


Create Statistical Key Figure : Initial Screen



**STEP 2**

1. Fill in the code of statistical key figure you want to create
2. Click on Master Data o r Enter ↵



**STEP 3**

1. Enter a name
2. Indicate a unit of measure (press Enter to display the name).
3. Specify if the key figure values

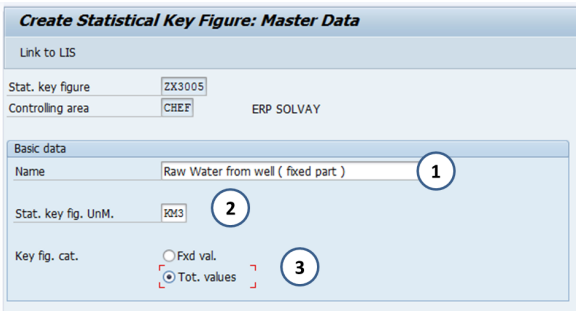
- There are 2 kinds of Statistical Key Figures, with fixed values and with total values, see in the master data in the category field.

  For Statistical Key Figures with **Total values:**

  - Postings are valid for the month only ; if not posted on a specific month no value is available;
  - Postings in the month are adding ; if a file is posted twice on the same month, the quantities in SAP will be double.

  For Statistical Key Figures with **Fixed values** :

  - Postings are valid for several months ; if not posted on a specific month the value of the previous month is used;
  - Subsequent postings are replacing the previous ones (from



the month or before) ; if a file is posted twice on the same month, for each receiver only the last input will be taken into account ;

- As a consequence, ***if we need to fully eliminate a value for a receiver coming from a previous posting (value not replaced), it is necessary to post "0" on this receiver.***
