## Guideline

This could only be done when there is changes on organization or a new organization. New plant, project, roll-out.

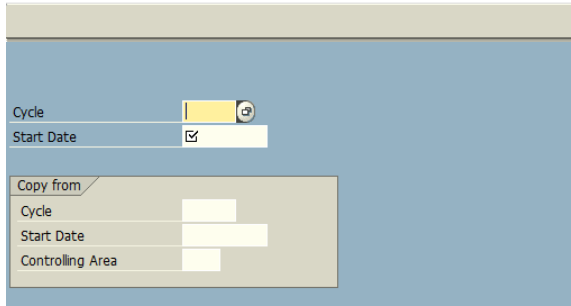

Following the rules from **PF2** and **WP2** ([Assessment cycles Rules](#)), we should not create any new cycles if there is not any change, due to the harmonization that exists.

### STEP 1

Use transaction code : **KSU1**

 KSU1 - Create Actual Assessment Cycle : Initial Screen

### Create Actual Assessment Cycle: Initial Screen

### STEP 2

Enter the cycle code and the

starting date and

Enter ↵

**i** Assessment cycles Rules - Necessary to Use the Rules for Codification

If you want to copy from another cycle (Normally to create again a cycle from one year to another):

- Cycle - Cycle Name (Maintain the Name the codification)
- Start Date - 01.01.YYYY
- Controlling Area - See link for possible [Controlling Areas](#)

### Create Actual Assessment Cycle: Initial Screen

#### STEP 3

1. Enter the validity date (to last day of the year)
2. Enter the description of the cycle
3. Check the Indicator "Iterative"
4. Check the Field Groups "Object Currency"

### ERP Client Languages

When creating an Distribution Allocation, the texts must be added also in the other language ERP (both cycle name and segment name and description). To do that you must logoff, enter in the language requested (e.g. DE), and modify (KSV2) the Distribution Allocation, adding the names and descriptions in the local language.

### STEP 2

Enter the cycle code and the starting date and

### Create Actual Distribution Cycle: Initial Screen

### Validity Date

The starting date determines the earliest validity date of the cycle. If a similar cycle already exists you can make a copy from the reference cycle and modify it afterwards. You can display the existing cycles by selecting the match code.

### Codification Rules

[Assessment cycles Rules](#)

For the name codification consider CC CCDV where CCCC is the company code and for DV is for Distribution Cycles, whenever a company is harmonized on SYMPA standards.

### STEP 3

1. Enter the validity date (to last day of the year)
2. Enter the description of the cycle
3. Check the Indicator "Iterative"
