

# What's Tag navigation?

## Tag navigation

Key features:

- This feature allows visitor to see the **LATEST CONTENTS** of the selected tag in an Editorial page
- The search is performed based on all the contents that are **WITHIN THE SPACE**

|                                                                                                                                                                                                          |                                                                                      |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| Tag in an Editorial page                                                                                                                                                                                 |    |
| Mouse roll-over on a Tag.<br>Click.                                                                                                                                                                      |   |
| The Tag navigation panel is expanded.<br>The list of latest contents is displayed.<br>"X" to close the panel / click again on the tag to close the panel.<br>"View more" button to load another 5 items. |  |
