

Add authorizing group to a role

When we get any ticket in **Labware** application for adding groups to any role.

The following procedure can be followed.

- The role is just like a user in Labware, so we can open the user table and click on the user (Role).
- We need to then click Configure.
- Then click Groups and move the group from the left pane (unassigned Groups) to the right pane (assigned Groups) and save.

Please check for reference ticket
