## Description Responsibility Area & Process

### Assessment cycles

An **assessment cycle** is used in SAP to assign all primary cost elements and secondary cost elements from a sending cost center to the receiver cost center. When you want to transfer costs from one cost center to another through an assessment cycle, sap use a **secondary cost element** and accumulates all the primary cost and secondary cost and send it to the receiving cost center.

### Definition

An **assessment cycle** is used in SAP to assign all primary cost elements and secondary cost elements from a sending cost center to the receiver cost center. When you want to transfer costs from one cost center to another through an assessment cycle, sap use a **secondary cost element** and accumulates all the primary cost and secondary cost and send it to the receiving cost center.

#### PF1

In PF1, assessment cycles are used to:

- Allocate common production & utilities cost centers to Workshops cost centers (EE32xxxxxx or EE193xxxxx)

The codification of the **secondary cost element** to be used is: 91xxxx  
xxxxxx

#### WP1

In WP1, assessment cycles are used to:

- Allocate common production cost centers (PPPP-2xxx) to Workshops cost centers (PPPP-1xxx)

The codification of the **secondary cost element** to be used is: 99xxxx  
xxxx

## Maintenance of cycles in SAP

### SAP transactions

- KSU1 - Create Actual Assessment Cycle
- KSU2 - Change Actual Assessment Cycle
- KSU3 - Display Actual Assessment Cycle

### Example

- [Cycles PF1 - Example](#)

### List of cycles

| PF1                                                                                                                                                                     | WP1                                                                                                                                                                                                                                         |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> <li>• IAS19 PF1 - cycle CCCC DV</li> <li>• Restructuring PF1 - cycle CCCC R2</li> <li>• Restructuring PF1 - cycle CCCC RT</li> </ul> | <ul style="list-style-type: none"> <li>• IAS19 WP1 - cycle CCCC 19</li> <li>• Restructuring WP1 - cycle CCCC R2</li> <li>• Restructuring WP1 - cycle CCCC RT</li> <li>• Cycles - codification WP1</li> <li>• Cycle insurance WP1</li> </ul> |

In WP1, assessment cycles are used to allocate common production cost centers ( PPPP-2xxx ) to Workshops cost centers ( PPPP-1xxx )

## COPA Assessment cycle

COPA Assessment cycle assesses costs from a Cost Center to COPA Value Fields.

In **PF2**, the P&L is built in COPA, cost centers are assessed to a value field in COPA with a secondary cost element 98xxxxxxx

In **WP2**, the P&L is built in COPA, cost centers are assessed to a value field in COPA with a secondary cost element 994299xx

## Distribution cycle

**i** A **distribution cycle** is used in SAP to transfer primary costs from a sender cost center to receiving controlling objects. The original cost element remains the same.

In **PF1**, distribution cycles are used for IAS 19

When you create a cycle to distribute corporate IAS19 costs in PF1, you must follow the following steps:

### STEP 1

#### Create a distribution cycle with KSV1 - Create Actual Distribution Cycle

1. Cycle = CCCCDEV
2. Start Date = 01.01.20YY to 31.12.20YY
3. Text = Distribution (IAS19)

The screenshot shows the SAP distribution cycle creation screen. The Controlling Area is **CHEF** and the ERP SOLVAY is **ERP SOLVAY**. The Cycle is **0001DV** (marked with a circled 1) and the Status is **Saved** (marked with a circled 2). The Start Date is **01.01.2024** and the To date is **31.12.2024**. The Text is **Distribution (IAS19/Insurance)** (marked with a circled 3). The Indicators section has **Iterative** checked, **Cumulative** unchecked, and **Cumulated Opt** unchecked. The Field Groups section has **Consumption** unchecked, **Object Currency** checked, and **Transaction Curren** unchecked.

### STEP 2

#### Only one segment needs to be created

1. Segment name = **EE800IAS19**
2. Segment description = **IAS 19 BFC Dotation**
3. Sender values =
  - Sender rule: **Posted amounts**
  - Share in %: **100**
  - Act. vals

The screenshot shows the SAP distribution cycle creation screen for the Segment Header. The Controlling Area is **CHEF** and the ERP SOLVAY is **ERP SOLVAY**. The Cycle is **0001DV** and the Distribution (IAS19/Insurance) is **Distribution (IAS19/Insurance)**. The Segment Name is **SM800IAS19** (marked with a circled 1) and the Lock indicator is **IAS19 BFC Dotation** (marked with a circled 2). The Sender values section has **Sender rule** set to **Posted amounts** (marked with a circled 3), **Share in %** set to **100,00 %**, and **Act. vals** selected. The Receiver tracing factor section has **Receiver rule** set to **Variable portions**, **Var.portion type** set to **Actual costs** (marked with a circled 4), and **Scale Neg. Tracing Factors** set to **No scaling**.

#### 4. Receiver tracing factor

- Receiver rule: Variable portions
- Var.portion type: Actual costs
- Scale Neg. Tracing Factors: No scaling

#### 5. Sender cost center = EE 800IAS19

#### 6. Sender cost elements group = ZS O-P20010

#### 7. Receiver cost centers group = E\_CCCC (= all cost centers of the company)

|                                         |            |                                |

Distribution cycles are used for:

When you create a cycle to distribute corporate insurance costs in WP1, you must follow the following rules

#### STEP 1

#### Create a distribution cycle with KSV1

1. Cycle = CCCCIN
2. Start Date = 01.01.20YY to 31.12.20YY
3. Text = Corporate Insurance Cycle
4. Uncheck "Iterative"

#### STEP 2

Create 8 segments detailed below

|                                                      |                                     |                                             |                                                     |
|------------------------------------------------------|-------------------------------------|---------------------------------------------|-----------------------------------------------------|
| <b>Create Actual Distribution Cycle: Header Data</b> |                                     |                                             |                                                     |
| Attach segment                                       |                                     |                                             |                                                     |
| Controlling Area                                     | Z006 Rhoda Europe                   | Cycle                                       | ZFR3IN ①                                            |

When you create a cycle to distribute corporate IAS19 costs in WP1, you must follow the following steps:

#### STEP 1

### Create a distribution cycle with K SV1 - Create Actual Distribution Cycle

1. Cycle = CCCC19

2. Start Date = 01.01.20YY to 31.12.20YY

3. Text = IAS 19 Service Cost Allocation

< SAP Create Actual Distribution Cycle: Header Data

Attach segment More

Controlling Area: 2006 Solvay Europe  
Cycle: ZFR319 Status: new  
Start Date: 01.01.2025 To: 31.12.2025  
Text: IAS 19 Service Cost Allocation

Indicators: [X] Iterative, [ ] Cumulative, [ ] Cumulated Opt

Field Groups: [ ] Consumption, [X] Object Currency, [ ] Transaction Current

## STEP 2

**Only one segment needs to be created**

1. Segment name = CCCC-5998

2. Segment description = IAS 19 Service Cost Alloc

3. Sender values =

- Sender rule: Posted amounts
- Share in %: 100
- Act. vals

4. Receiver tracing factor

- Receiver rule: Variable portions
- Var.portion type: Actual costs
- Scale Neg. Tracing Factors: No scaling

5. Sender cost center = CCCC-5998

6. Sender cost elements group = ZSO-P20010

7. Receiver cost centers group = CCCC (= all cost centers of the company)
