Guideline

This could only be done when there is changes on organization or a new organization. New plant, project, roll-out.

Following the rules from **PF2** and **WP2** ([Assessment cycles Rules](#)), we should not create any new cycles if there is not any change, due to the harmonization that exists.

ERP Client Languages

When creating an Distribution Allocation, the texts must be added also in the other language ERP (both cycle name and segment name and description). To do that you must logoff, enter in the language requested (e.g. DE), and modify (KSV2) the Distribution Allocation, adding the names and descriptions in the local language.

The screenshot shows the SAP 'New password' screen. The 'Client' field is set to '020'. The 'User' field is set to 'PT400083'. The 'Password' field is masked with asterisks. The 'Logon Language' is set to 'DE'. On the right, there is an 'Information' section with a welcome message and a list of available clients: 009 IM Production Client, 020 ERP SOLVAY Production, 050 Core - References, and 150 Actionnaires-Shareholders.

STEP 2

Enter the cycle code and the starting date and

Enter ↵

Validity Date

The starting date determines the earliest validity date of the cycle. If a similar cycle already exists you can make a copy from the reference cycle and modify it afterwards. You can display the existing cycles by selecting the match code.

Create Actual Distribution Cycle: Initial Screen

The screenshot shows the 'Initial Screen' for creating a distribution cycle. The 'Cycle' field is set to '6062IN'. The 'Start Date' is set to '01.01.2015'. There is a 'Copy from' section with fields for 'Cycle', 'Start Date', and 'Controlling Area'.
