

IAC 01.01. Costing model validation

Process: [Product Costing](#)

Responsibility area: [Internal Control Monitor](#)

Risk

Wrong fixed cost absorption in inventory, plant costing model do not comply with group rules

Objective

[Service Unit Management accounting](#) control plant costing model yearly update

Process description

Costing model is the document which explains the way fixed costs and depreciations are allocated to product costing in order to determine the cost of sales and inventory valuation. FRA are in charge of preparing the costing model based on the budget using the respective template of WP2 or provided by SU MAC (e.g. extract of the cycle structure for PF2).

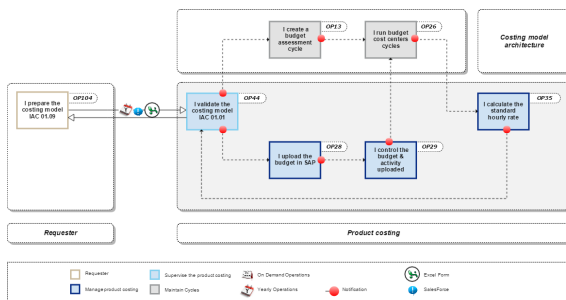

The instruction notes to complete the template of WP2, **under FRA responsibility**, are below:

[Costing Model - FRA preparation](#)

FRA asks for the validation of the GCCO.

Control description

[Service Unit Management Accounting](#) reviews through a checklist, costing models prepared by each Finance responsible assigned (FRA) of his/her zone and the respective update in SAP done by Service Unit Management accounting. SU MAC is making sure that costing model has been reviewed and validated by the GCCO for each plant in the scope of internal control

Scope

WP2 / PF2

Frequency

Due date : January

Control owner

Service Unit Management accounting - Costing user by region

Guideline

TBD

Unable to render {include} The included page could not be found.

TBD

Reference

Next Operating Procedure: [OP26](#), [OP27](#)

Similar Operating Procedure Task:

STEP 1

Once a file is completed you send it to group email for each region : GBS_Finance_Management_Acc_Bangkok@syensqo.com

GBS_Finance_Management_Acc_Curitiba@syensqo.com

GBS_Finance_Management_Acc_Lisbon@syensqo.com

They will :

- Upload the budget in the system
- Create the assessment cycle
- Calculate the standard rates

STEP 2

You can also update the check list for the IAC 01.01

Just update the columns with "Y" if the information is correctly completed or "N" if it is not.

CH Baotou	✓	✓	✓	✓	✗	✓	File sent to the BO	xxx@solvay.com	15-11-2015	

 When there are changes in the cost centers structure, you must inform the person in charge

[Request the modification of a cost center](#)

I am informed once the standard rates are calculated in the system

You must compare the activity rates calculated in the system with what is in the file sent by the FRA

In SAP, you must use the transaction KSBT

In the file IAC 01.01, use the tab : 2b-Activity TOTAL

 When the model is too complex, the simulation made in the excel file doesn't work then you have to make further investigation

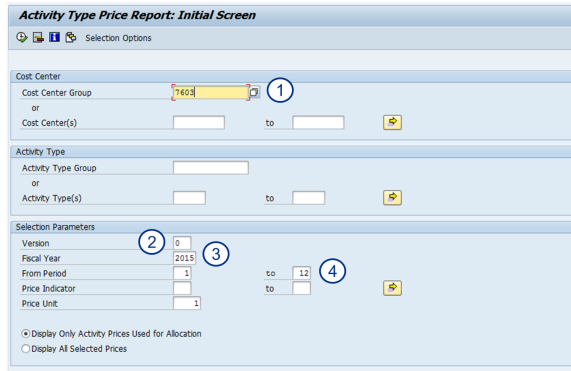

STEP 1

Open the transaction KSBT

Enter :

1. The group of cost centers (usually the plant code)
2. Version = 0
3. Enter the fiscal year
4. From Period 1 to 12

Execute 

Activity Type Price Report: Initial Screen

Selection Options

Cost Center
 Cost Center Group: 7603
 or
 Cost Center(s): to

Activity Type
 Activity Type Group:
 or
 Activity Type(s): to

Selection Parameters
 Version: 0
 Fiscal Year: 2015
 From Period: 1 to 12
 Price Indicator: to
 Price Unit: 1

Display Only Activity Prices Used for Allocation
 Display All Selected Prices

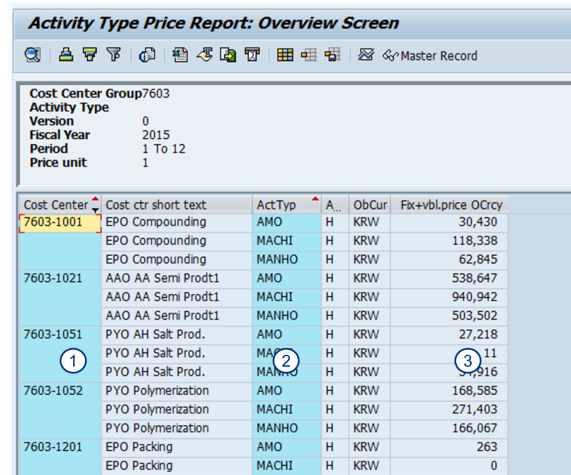

STEP 2

Activity Type Price Report

1. List of cost centers
2. Activity types
3. Price per hour

 Make sure you selected the activity price in **object currency** otherwise you must change the layout

You can export the file in excel

Activity Type Price Report: Overview Screen

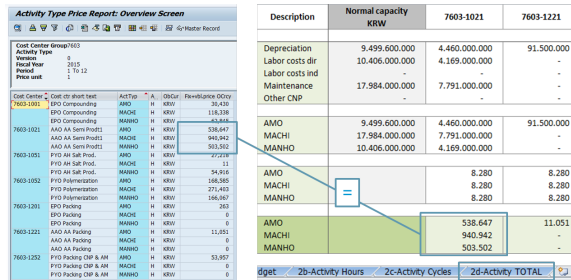

Cost Center Group: 7603
 Activity Type: 0
 Version: 2015
 Fiscal Year: 1 To 12
 Period: 1
 Price unit: 1

STEP 5

Inform the person who calculated the standard in the system if there is a mistake in the system

I inform the requester that the standard rates are in the system

STEP 1

Once the standard rates of a plant are loaded in WP2 and approved you must update the check list

Below see the details of this report:

The report is designed in PF2 & WP2 to extract CO cycle master data with standard ALV layout, which is compatible for kinds of cycles, including:

- COPA Actual assessment cycle
- COPA Plan assessment cycle (not used in RCS)
- Cost center Actual Assessment cycle
- Cost center Plan Assessment cycle
- Cost center Actual Distribution cycle
- Cost center Plan Distribution cycle

Column label in report output

As a cycle consists of kinds of information at header / segment level, and in each segment, there are fields for sender / receiver respectively, and even for receiver side, the percentage split can be applied for multi-receiver objects.

So, to facilitate identifying the column nature and improve the report understandability, a prefix is assigned for each column label:

- '[H]' stands for header level data, for example '[H]Cycle'.
- '[S]' stands for segment general data, for example '[S]Segment Name'.
- '[S-S]' stands for segment sender data, for example '[S-S]Sender Cost Center / grp'
- '[S-R]' stands for segment receiver data, for example '[S-R]IECRA'
- '[S-T]' stands for segment receiver (or sender) multi objects split data, for example '[S-T] Factor Value'.

[H]Table	[H]Cycle	[H]Start Date	[H]Cycle text	[H]Text language	[S]Segment number	[S]Segment Name	[S]Segment text
CCSS	Z0010228MA	01.01.2005	test maintenance externe	EN	1	MAINTFOR	external maintenance gorzow
CCSS	Z001BEP101	01.01.2002			1	WATER1	
CCSS	Z001BEP101	01.01.2002			2		
CCSS	Z001BEP				3		
CCSS	Z001BEP				4		
CCSS	Z001BEP101	01.01.2002			5	USTEAM1	
CCSS	Z001BEP101	01.01.2002			6	UOTHER1	

Two options available in output

As a cycle allows for the percentage split in the case of multi receiver objects, it makes difficult to show all information in a single output with good understandability.

With this consideration, 2 output options are designed:

Output options

Standard output

 Extended output with multi-object split

- Standard output
 - Each row represents a unique segment in a cycle, showing cycle header data / segment general data / sender data / receiver data.
 - But multi-object split info is excluded here.
 - Column with '[S-T]' prefix in label is not available in the option.
- Extended output with multi-object split
 - This layout is recommended ONLY when user needs to check the multi-object split percentage.
 - Column with '[S-T]' prefix in label is feed in the option.
 - All multi-object split info is showed as extra rows, means, all rows showed in Standard layout will be showed here as well exactly, but append some extra rows which are dedicated to show the multi-object split info. In other words, Extended output = Standard output + extra entries for multi-object split info.

Coloring the entries for multi-object split info

- In Extended output with multi-object split, the extra entries for split info is highlighted in light green color. See below picture for example.
- PS: Another way to differentiate the extra entries is to use one of below 2 columns:
- [S-T] Sender / Receiver Indicator. When it is not Null, it's the extra entries.
- [S-T] Item Number. When it is not Null, it's the extra entries.

Cycle master data extraction report

[S]Segment number	[S]Segment Name	[S-T]Sender / Receiver Indicator	[S-T]Item Number	[S-T]Factor Value	[S-T]Element1	[S-T]Element2	[S-T]Element3	[S-T]Element4

Tips to know the cycle category

Below 3 columns can be used to understand the feature of certain cycle.

- [H]Table, to know it's cost center or COPA cycle
 - CCSS -- Cost center cycle
 - CE7Z0xx -- COPA cycle (Z0xx is the operation concern code)
- [H]Actual/plan indicator, to know it's Actual or Plan cycle.
 - I -- Actual

- P -- Plan
- [H]Type of allocation, to know it's Assessment or Distribution cycle.
 - U -- Assessment
 - V -- Distribution
 - L -- Indirect activity allocation
 - ... etc.

Receiver / Sender multi-objects split

- In WP1, the percentage split is widely used at receiver side for multi-object case. But in some limited case, a specific amount is given to individual cost elements to restrict the allocation at sender side. For the both cases, in the report output, the information will be showed in the same columns with prefix '[S-T]'.
- For users, to know the split information is for receiver or sender, column '[S-F]Sender / Receiver Indicator' can answer,
 - when the value is 'R', the entry is for receiver factor,
 - when the value is 'S', the entry is for sender factor.

Cycle master data extraction report

[S-R]MAGNITUDE Market	[S-T]S...	Seq.	[S-T]Factor Value	[S-T]Element1	[S-T]Element2	[S-T]Element3	[S-T]Element4
	R	1	20.00	0195-1000			
	R	2	50.00	0195-1100			
	R	3	10.00	0195-1110			
	R	4	10.00	0195-1200			
	R	5	5.00	0195-1300			
	R	6	5.00	0195-1400			
				0195-1000			
				0195-1100			
				0195-1110			
	R	4	10.00	0195-1200			
	R	5	5.00	0195-1300			
	R	6	5.00	0195-1400			

Combine 'from' 'to' 'group' into one field

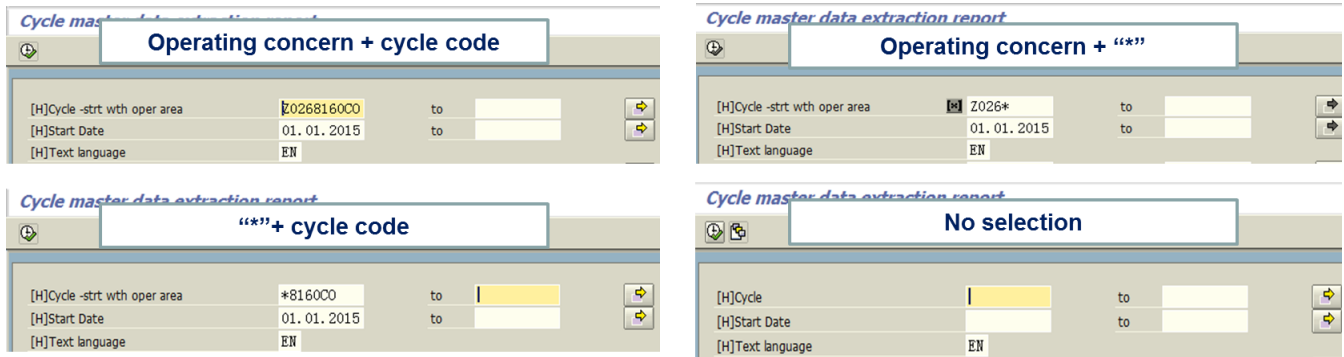

- When creating a cycle, to specify sender / receiver, user can input 'from' only to show a single object, or input 'from' and 'to' to show a range, or even use 'group' to show a collection list.
- In order to reduce the column quantity in the report output, the information in 'from' 'to' 'group' is combined into one single column.

Cycle master data extraction report

[S-R]Order Number	[S-R]Cost Center / grp	[S-R]Product number
A group	0228-FCE	
	0195-1000 to 0195-1300	
	0195-1000 to 0195-1300	
Single object	0195-1000	
	0195-1000	
	0195-1000 to 0195-1300	
From... to...	0195-1000 to 0195-1400	
	0195-1000 to 0195-1300	
	0195-2000	

'[H]Cycle' code start with operation concern

- When put cycle code as selection criteria, please start with the operation concern code then follow by cycle code, as this is the way SAP store the cycle master data in tables.
- As a tip, all below options work

Workflow history

When transaction ZWFAR600 is executed and you have the list of all cycles, it is time to extract to excel.

- 1) Go to List Export Spreadsheet

[H]Cycle	Valid From	[H]Cycle text	L...	[H]Valid To	S	Created on	[H]Entered by	Change
CHEF4056BN	01.01.2020	Bonus accrual - Social Charges	EN	31.12.2020	3	11.11.2019	PT400078	06.03
CHEF4056BN	01.01.2020	Bonus accrual - Social Charges	EN	31.12.2020	3	11.11.2019	PT400078	06.03

CHEF4056BN	01.01.2020	Bonus accrual - Social Charges	EN	31.12.2020	3	11.11.2019	PT400078	06.03

This excel document will be the COSTING MODEL of your company.

1) Send through Solvay One the COSTING MODEL extracted in previous step to the FRA/Controller to be used in the review of the cycles for the new year

After the review, I receive from FRA the cycle changes for the new year.

- With the changes highlighted in the COSTING MODEL
- Or, changes detailed in the freshdesk

Depending on the type of cycle, I use KSU2, KEU2, KSV2

STEP 1

Start the transaction using transaction code **KSU2**

i Change Actual Assessment Cycle: Initial Screen

Change Actual Assessment Cycle: Initial Screen

STEP 2

Enter the cycle code and the starting date

and **ENTER ↵**

Change Actual Assessment Cycle: Initial Screen

i If you don't know the Starting Date, do not insert the date, **ENTER ↵** and choose the most recent one.

STEP 3

Open the Segment Overview dialog box

Click 

Change Actual Assessment Cycle: Header Data

First segment Attach segment

Controlling Area: CEEF ERP SOLVAY
 Cycle: 0125ID Status: Saved
 Start Date: 01.01.2015 To: 31.12.2015
 Text: Indirect Cycle

Indicators:
 Iterative
 Cumulative
 Cumulated Opt

Field Groups:
 Object Currency
 Transaction Currency

STEP 4

Select the segment to be updated and choose 

Or create a new segment by clicking

Attach segment

Change Actual Assessment Cycle: Header Data

Segment Header Senders/Receivers Sender Values Receiver Tracing Factor

STEP 6

After the appropriate changes to the segment, click on  , to do a Formal Check.

If there is any errors you need to analyse and correct.

Disregard Warnings 

STEP 7

After the appropriate changes and the formal check Save  .

STEP 8

It is also possible to perform mass changes on cycles in terms of dates.

To do so, please contact IS Team by the appropriate tool, requesting the creation of a LSWM and providing the respective list of the cycles to be changed.

Afterwards, IS Team will request to process the batches sessions created for this purpose.

Before starting, make sure you are in the right operating concern with KEBC - [Setting Operating concern](#). List of operating concern : Rules - CO structure

STEP 1

Start the transaction using transaction code KEU2

CO-PA Change Actual Assessment: Initial Screen

STEP 2

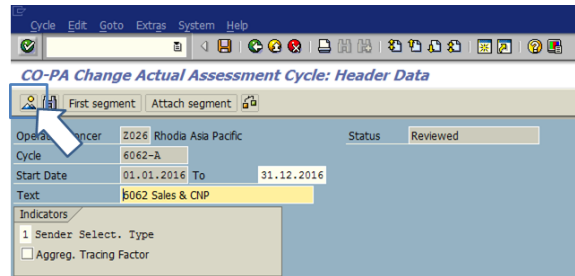

Enter the cycle code and the starting date

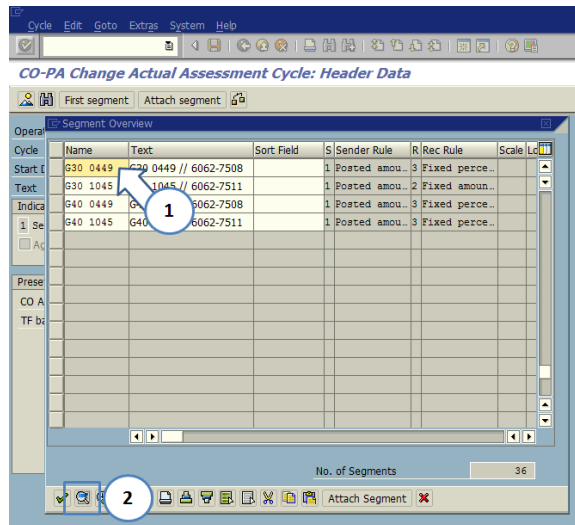

STEP 3

Open the Segment Overview dialog box

STEP 4

Select the segment to be updated and choose

Or create a new segment by clicking

Attach segment

STEP 5

Make the appropriate changes to the segment as required and save

STEP 6

It is also possible to perform mass changes on cycles in terms of dates.

To do so, please contact IS Team by the appropriate tool, requesting the creation of a LSMW and providing the respective list of the cycles to be changed.

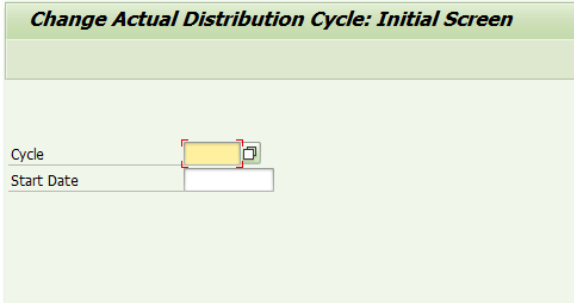

Afterwards, IS Team will request to process the batches sessions created for this purpose.

STEP 1

Start the transaction using transaction code KSV2

i Change Actual Distribution Cycle: Initial Screen

! Budget Distribution
For budget distribution allocations insert KSV8.

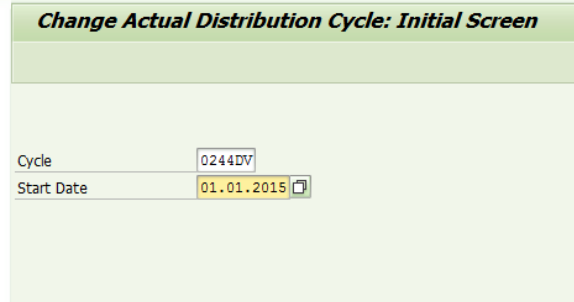

STEP 2

Enter the cycle code and the starting date

and

i If you don't know the Starting Date, do not insert

the date,
and choose the most
recent one.

Enter ↵

STEP 3

Open the Segment Overview dialog
box

Change Actual Distribution Cycle: Header Data
