Frequently Asked Questions

How do I know my workbook is based on the query BW_QRY_MPR_FC001_0001 ?

Go to [the design panel](#) and open the tab "information". In the pane "Information", you will see the name of the query used.

Is it a one time event or can these issues happen again ?

These issues should not happen again:

- Once the authorization scope is filled, there is no need to update it anymore
- The disappearance of the "structure" is also a one time event and only happened in the query BW_QRY_MRP_FC001_0001. It is an error that was not detected when a development was transported from the development environment to the production environment impacting the query BW_QRY_MRP_FC001_0001 only.

What can I do if after having followed the procedure, my workbook is not fixed ?

If you have followed the procedure and there is still no data in your workbook, you may contact the [Contact SBS Support](#) .
