

Mandatory Cleaning

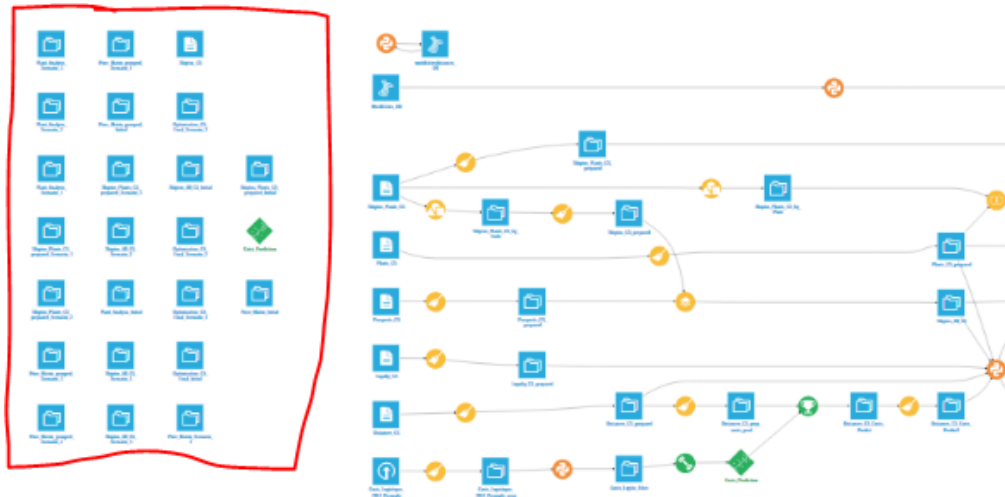

DSS is used and shared by many people, **so everyone must contribute to maintaining a cleaned and optimized environment.**

In your projects, you have to:

- **Drop your dataset correctly:** Check the box "drop data" for all the datasets you delete, otherwise, it is only deleted from the flow, but remains stored on disk

- **Drop all unused dataset in your workflow:**

- **Unload your Notebooks:** Click on the cross to unload your notebook and free memory. All your work remains saved.

Session GRICHARD__DKU__1880e4b9-6cf9-47f6-9345-e4648

- **Delete unused Analysis and Notebooks:**

[blocked URL](#) [blocked URL](#)

- **Delete irrelevant "Sessions" of your modelization:**

SESSION 6		
<input checked="" type="checkbox"/>	Random forest	0.983
<input type="checkbox"/>	Gradient Boosted Trees	0.982
<input type="checkbox"/>	Ordinary Least Squares	0.973
<input type="checkbox"/>	Ridge (L2) regression	0.967
<input type="checkbox"/>	Lasso (L1) regression	0.970
SESSION 5		
<input type="checkbox"/>	Random forest	0.988
<input type="checkbox"/>	Gradient Boosted Trees	0.988
<input type="checkbox"/>	Ordinary Least Squares	0.978
