

What is a space key and how can I find it ?

[[What is a space key ?](#)] [[How can I find the space key of an existing space ?](#)]

What is a space key ?

Each Confluence space has a space key, which is a short, unique identifier that forms part of the URL for that space.

 The space key can not be changed

How can I find the space key of an existing space ?

With the URL

The Space key can be found in the URL of the space

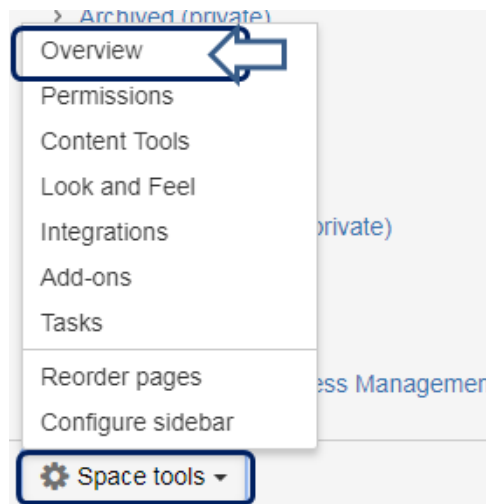

In this example the Space key of the space *My Business Apps* is **ISAPPSUP** :

In the space details

To edit a space's details:

Go to the space and choose **Space tools** > **Overview** from the bottom of the sidebar

In the Space Details, you can find the Space Key

Space Tools
