 - [Use case 1 journey](#)
 - [Use case 2 journey](#)

Definition

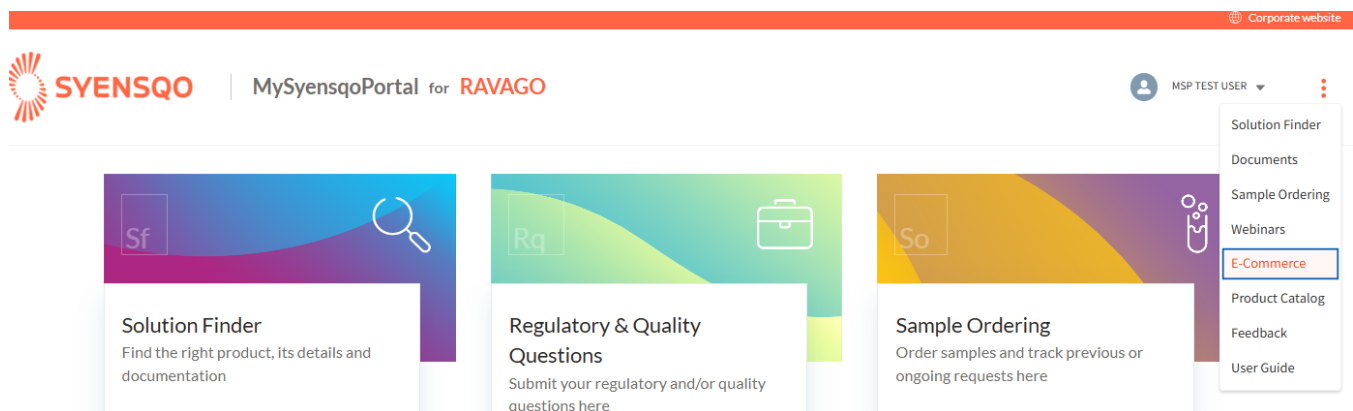

By definition, this is a link from MSP to Syensqo-eCommerce.

With this feature, it allows users of both systems (MSP and Syensqo-eCommerce) to no longer have to login with his Syensqo-ecommerce userid and password when in MSP - N/A SSO not in place

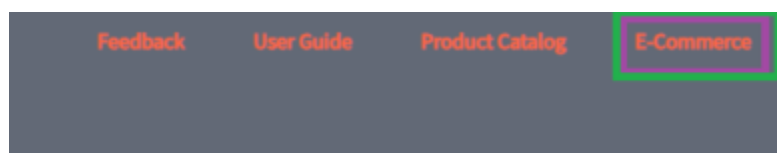

Accessing points

This capability can be accessed through several points in MSP detailed below :

Homepage

Footer

Use cases (N/A - SSO not in place)

Use case	MSP user account	Syensqo-eCommerce user account
Use case 1: User / Distributor is only using MSP	X	
Use case 2: User / Distributor is using MSP and Syensqo-eCommerce	X	X

Use case 1 journey

Context: User has only a MSP user account and is **NOT** a Syensqo-ecommerce user

Pre-requisite: The MSP user account is created only in Salesforce platform.

Journey:

- Log in to MSP
- Click to e-Ordering
- Since user is NOT a Syensqo-ecommerce user, it'll arrive to the Syensqo-ecommerce asking for a login.

Use case 2 journey

Context: User has a MSP user account and also has a Syensqo-ecommerce user account

Pre-requisite: The MSP user account is created in Salesforce platform and has to be matched with a "Federation ID". The "Federation ID" is the email address of the user from Syensqo-ecommerce platform.

Journey:

- Log in to MSP
- Click to e-Ordering
- SSO and redirect user to Syensqo-ecommerce platform in another tab without having to login again
