

I fill the broadcast Moving Average Price

The system calculates the moving average price automatically by dividing the material value in the stock account by the total of all storage location stocks in the plant concerned. It changes the price with each valuation-relevant movement.

The moving average price can be found with transaction MM03 in the field "Moving price" (view accounting 1 or Costing 2)

Default value: automatic update of the date
Default values: creation For another request tick the right box.
Compulsory information Write your name and your email address

Compulsory information Choose in the list the right element. For plants, you have a multiple choice possibility.
