Performance:

Summary of the number of action and main type of benefit

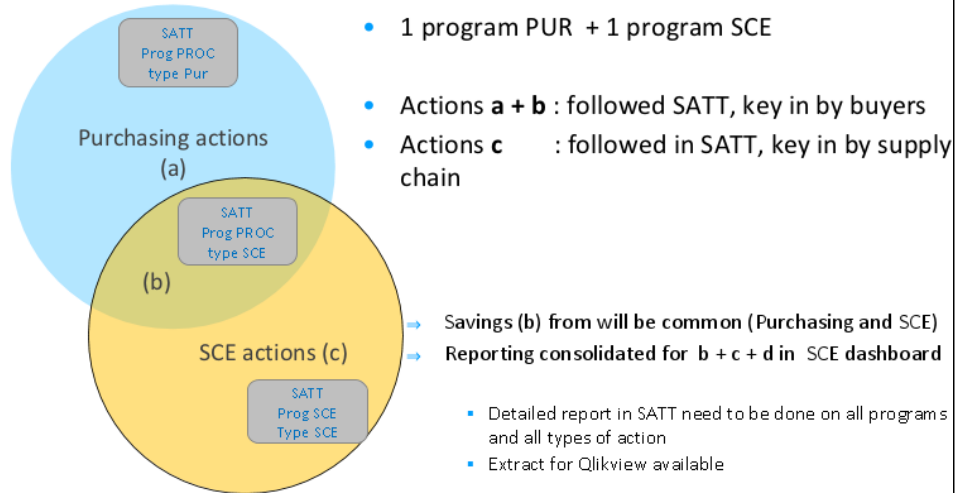

Perf.Details:

Setting your own performance report

Main Definitions	Unit (M= Million, K= Kilo, U= Unit): SATT benefit impact is based on Euro units. However by default SATT Pur displays benefits per Month/Year. Month/Year: This is the date of the last extraction from SATT tool. G.B.U. (Global Business Unit): These are the businesses impacted by the purchasing actions. This business perimeter is set by the buyer of the action Site: These are the location of the purchasing actions. The location is set by the buyer who is in charge of the action Site country: these data raise from Site. Domain (SCE): Global Purchasing Domain if the action comes from Procurement (Purchasing) program, click here to access to the GPS domain selected by the buyer who is in charge of the action. However, some domains dedicated to Supply Chain Excellence have been created (TOLLING, TRANSPORTATION, PLANNING...) Sub-Domain (SCE): Global Purchasing Domain, click here to access to the GPS' website. All Domains SCE are connected to the sub-Domains (Progressing, Inbound, Outbound etc) Action Type: This is the strategy which will allow to get the benefit. This type of action is set by the buyer who is in charge of the action Calculation rules: The buyer who is in charge of the action has been selected a calculation rules related to the expected benefit. Program: Origin of the action, Procurement = Purchasing actions, Supply Chain Excellence = Supply Chain actions On the bottom of the screens Manager: Manager who is hierarchical/functional responsible of the action. Buyer: Buyer is the leader of the action. Controller: These are the final approvers of the action, and they will confirm or will not confirm the achievement of the benefit at the end of the workflow. Type of Benefits: Type of benefits raises from calculation rules. Yearly according to the Purchasing Strategy, the weighted and the spend are defined (see: Calculation). Impact Year : Impact year is related to both information implementation year and benefit impact. Implementation date is set the beginning of the impact and benefit impact is set the duration of this benefit.
