

Rules - Cost center Codification

 The codification of cost centers is different in WP2 & PF2. Depending on the type of request, you must follow the corresponding rules.

An useful reference to the codification of the cost centers is the Assessment cycle rules file for [WP2](#) or for [PF2](#). This file is particularly helpful in identifying the codification for technical cost centers.

Production cost centers

Standard codification

The codification of an organizational cost center used for production is the combination of :

- Establishment code
- Cost section
- Code Prix de Revient (=CPR) that can be found with [PF2 - Table ZZRT179V - Product hierarchies](#)

Note: Finance workflow is checking if the "Cost section" code is valid, reading table "ZZK_SECTION" in PF1_050; it should be maintained when required.

Example

Codification of a cost center used for the workshop F2 in the plant OSF Onsan

Other cost centers

Standard codification

The codification of an organizational cost center not used for production is the combination of :
