

Cycle Run Group Rules

PF1

In PF1, the Cycle Run Group is the company code.

WP1

In WP1, the Cycle Run Group is:

- PPPP = plant code for production cost centers cycles
- CCCC = company code for cost centers at company code level

For Brasil / WP1 the CRG may be always according to CCCC because we have a plant 7525 that is same code of 7525 Company. Moreover, all CCA cycles run in sequence and this may not be changed.
