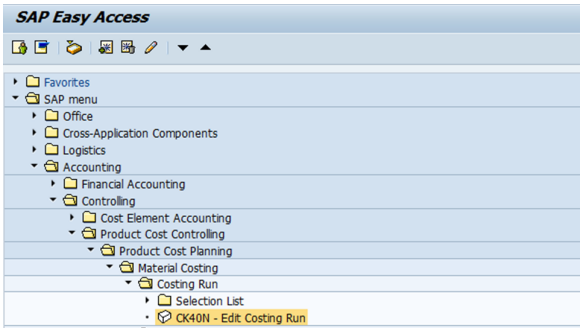
CK40N - Costing run analysis

STEP 1

Start the transaction using the menu path or transaction code CK40N

Double-click

CK40N - Edit Costing Run

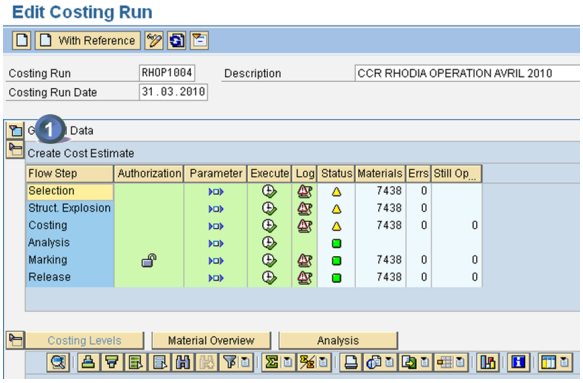


STEP 2

1. enter the costing run of the month and Enter

STEP 3

1. **Expand**



STEP 4

All error messages must be cleared

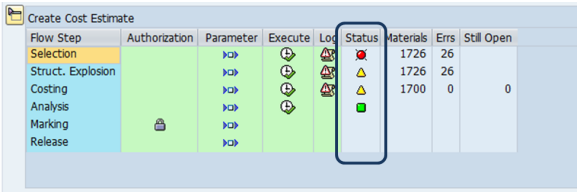
When there is a warning message, it often happens that there is a mistake in the costing. So even if it is not compulsory, it is recommended to check the warning messages and try to correct it.

Note: Sometimes, despite not having any error, some materials remain in column "Still Open". This is related with a technical issue linked to the mixed-costing materials. In order to correct the display table it's necessary to execute transaction CKSU.

STEP 1

WP1 + PF1

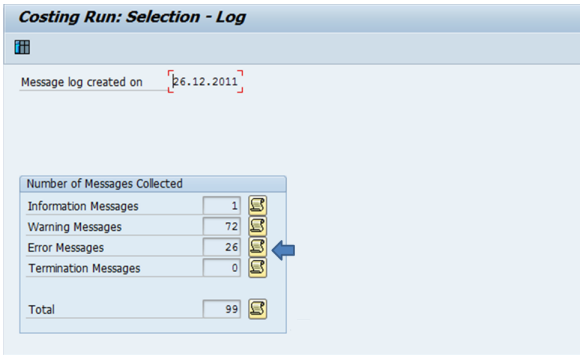
When there are error or warning messages, you must click on to analyse and clear them



STEP 2

WP1 + PF1

Click on to have the list of messages



STEP 3

WP1 + PF1

1 - Type of message

Error messages, must be cleared

Warning messages, must be analysed and cleared as much as possible

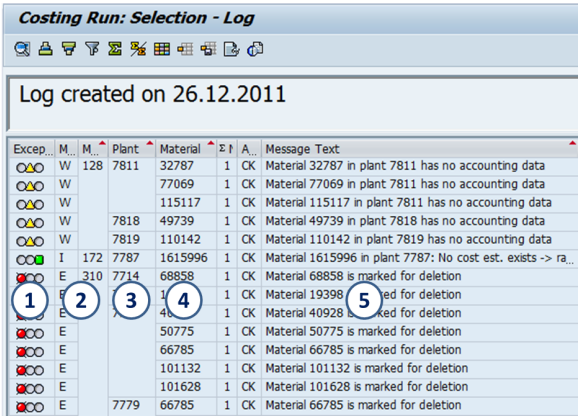
Information messages

2 - Message code

3 - Plant code

4 - Material code

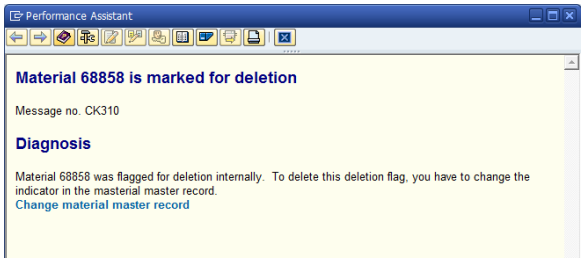
5 - Message description



STEP 4

WP1 + PF1

You can double-click on a message to have a more detailed description of the issue



CK060 - Object was not costed

CK249 - Cost component split for material not saved

CK310 - Material is marked for deletion

CK380 - No valid source of supply could be found

CK468 - No price could be determined for subcontracting

CK023 - No control record for Activity type CHEF/X332900700/ZZANO2 in version 000 / 2017 activity planning/qty planning

CK354 - Material XXXX in plant YYY has material status Z4 : Material deleted

CK430 - Missing formula in work center xxxxx

CK862 - Material XXX in plant XXX does not contain any segment for in-house production

CK053 - Deletion indicator set in material - plant

CK054 - Deletion indicator set in material - valuation area

CK080 - Material plant : BOM not active

CK082 - Material plant: no suitable BOM found

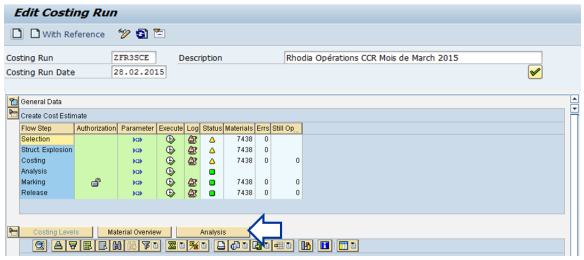
CK128 - Material in plant has no accounting data.

CK382 - Material does not exist in withdrawal plant

CK858 - No suitable or valid production version

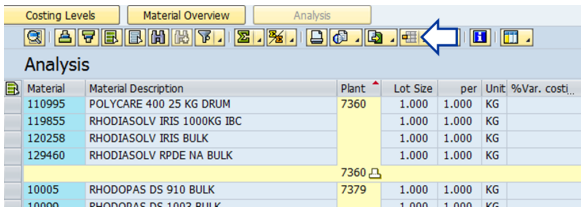
STEP 5

When errors are corrected and warning messages checked , costing analysis can begin. Click on



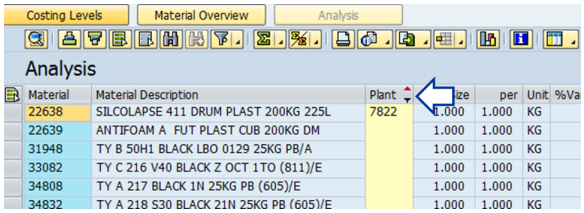
STEP 6

Select the variant. In this example, we are using the variant /IAC0102



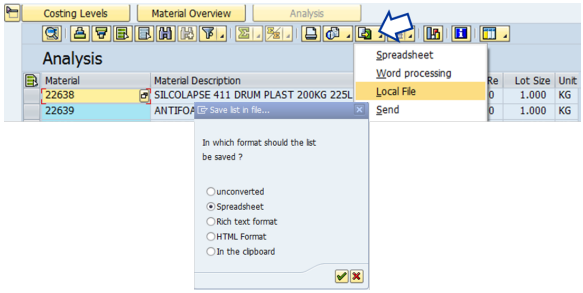
STEP 7

Filter the plant you are responsible for



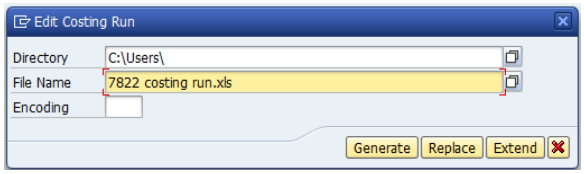
STEP 8

Save in excel : local file => spreadsheet



STEP 9

Enter the directory & the file name and generate the file



STEP 10

All variances above a defined threshold must be commented. The threshold is defined by the FRA :

- Unit cost variance %
- Inventory revaluation value.

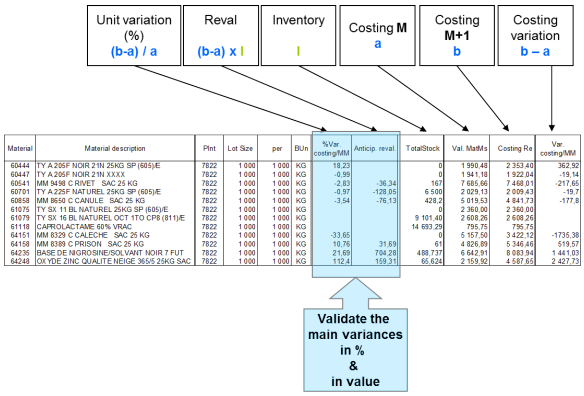
If the threshold is above +/- 10% at unit cost level or +/- 50 k€ at item inventory revaluation level should be authorized by RCOM.

Open the file

If:

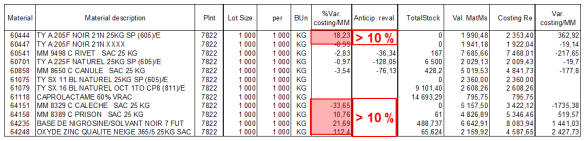
- the unit variation is > 10% (or local threshold)
- or Anticipated reval is > 50 kEUR (or local threshold),

a deeper analysis is requested



In this example, the costing of the following materials 60444, 64151, 64158, 64235, 64248 have to be checked and validated

as the variance is above 10% or/and the revaluation above 50 k€



STEP 1

Ex : 64235 BASE DE NIGROSINE /SOLVANT NOIR 7 FUT

The MAP increased from 6 643 € to 8 083 €

- We have to validate the MAP (Moving Average Price) by checking purchase orders of the month.
- It can also help to check the purchase variance of this

material (KE30) to define where does the increase come from.

MAP end M-1	MAP end M
6 643 €	8 083 €

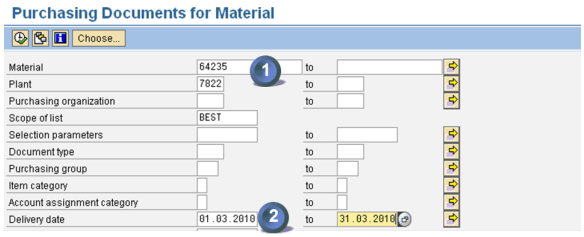
+ 1 441 €
+ 21,69 %

STEP 2

Display purchase orders with the transaction **ME2M**

Enter

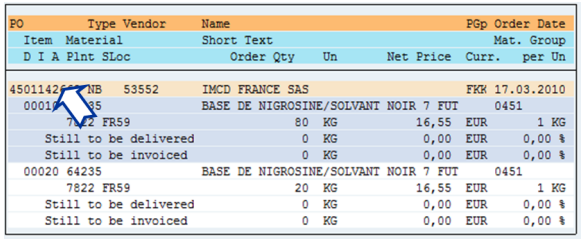
1. the material code & the plant
2. the period



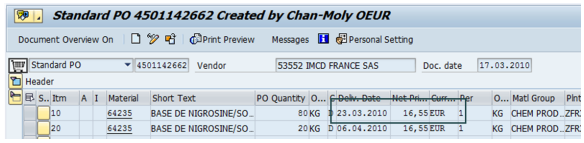
STEP 3

There is one purchase order to check.

=> Double-click on it



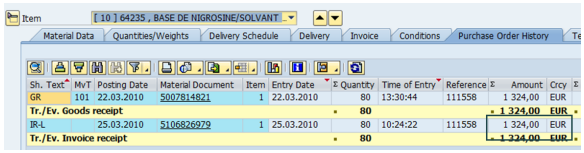
In march, the purchase price is 16,55 € / KG



It corresponds to the price invoiced

= 1 324 € / 80 kg

= 16,55 € / kg

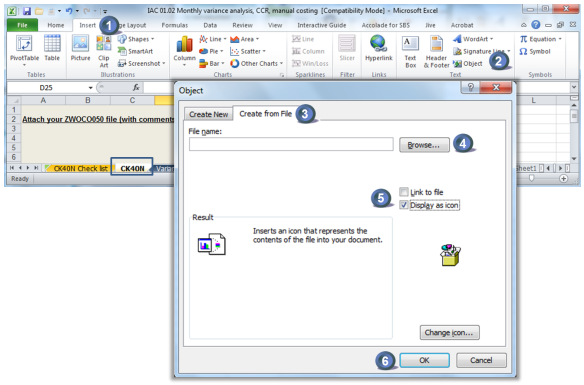


At the end of M-1, the MAP was 6,64 € / kg. As the purchase price of M is 16,55 € / kg, it is normal that the MAP increases in M.

If there is a mistake in the calculation of the new MAP due to an error in the purchase order, invoice price etc:

- Ask to correct the purchase order,
- If the MAP is still not correct => use the field Commercial 1 in view accounting 2 to correct it manually,
- Prepare a documentation for control IAC 01.02

STEP 11

When the analysis is completed, insert the file with your comments in the file IAC 01.02 of the month (sheet "CK40N").


1. Select "insert"
2. Click on “Object”
3. Select “Create from File”
4. Click on “Browse” and select the file
5. Check “Display as icon”
6. Click on OK
