

I settle WBS (Work Breakdown Structure)

Process: Monthly costing and cost accounting closing

Responsibility area: Perform Costing Monthly Closing

Finance Site SBS:

SU MAC processes the settlements of the three items below respecting the given time table:

- PM-orders,
- WBS-elements,
- CO-orders,

The processing includes dealing with the generated messages. SU MAC investigates the reasons for error messages, looks for modifications and corrections if possible, and restarts settlements if needed.

- If an error blocks further processing and cannot be solved by SU MAC, the issue must be communicated to a contact in the area of plant maintenance.
- After having received the solution and corrections, SU MAC acts by launching a second time the corresponding transactions.
- Furthermore, SU MAC checks if the orders and the WBS treated in this procedure are completely settled.

Responsibilities of other functions:

- The processing of PM-orders and WBS-elements for maintenance and fixed asset operations can lead to a result with technical errors.
- In this case SU MAC must contact the local plant maintenance team, which is responsible for making the necessary corrections

Based on group core rules, all costs for maintenance and investment for fixed assets must be posted on special orders, created in the module of plant maintenance (PM). The cost of the orders are allocated to define maintenance and investment projects, created in the project system and defined in a hierarchy – work breakdown structure (WBS), where actual and budget figures can be compared.

I settle WBS (Work Breakdown Structure)

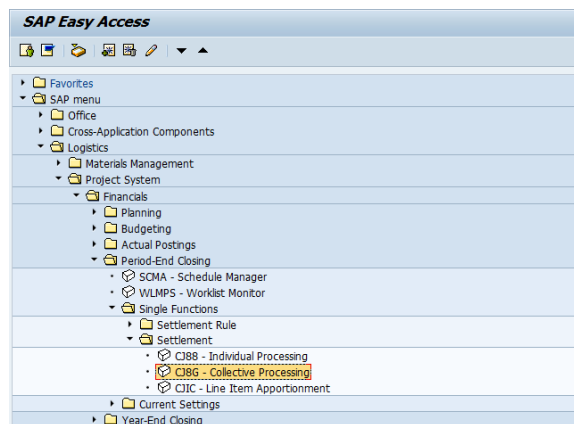

Guideline

All internal and PM orders should be settled as explained in [I settle internal Orders and PM orders](#).

STEP 1

Start the transaction using the menu path or transaction code

CJ8G - Collective Processing

Actual Settlement: Project /WBS Elements/Networks : initial screen

Actual Settlement: Projects/WBS Elements/Networks

Selection variant

Parameters

Settlement period Posting period
 Fiscal Year Asset Value Date
 Processing type

Processing Options

Background Processing
 Test Run
 Detail List
 Check trans. data

Layouts

STEP 2

Choose a defined selection variant

Click on  beside the field "selection variant"

Look for the variant and click on it

Actual Settlement: Projects/WBS Elements/Networks

Selection variant

Parameters

Settlement period Posting period
 Fiscal Year Asset Value Date
 Processing type

Processing Options

 Test Run
 Detail List
 Check trans. data

Layouts

Project selection variants

Variant catalog for program RKPSEL00

Variant name	Short Description
7154_SCMA	ALL WBS SETTLEMENT 7154
7214_LESROCHES	
7405WBS	7405 wbs
7405_CLOS OTC	7405_CLOSE(OTC)
7405_CLOSING	7405_CLOSING(PS)
7418_CLOSING	7418 WBS elements
7424_INVEST	7424 Investment => to Au
7439_PS	
7499_CLOSING	7499 WBS elements
7512_CLAMECY P	

STEP 3

1. Enter the settlement period
2. Enter the fiscal year
3. A test run can be made before, in order to check for possible errors.
4. Mark (optional) 'Detail list'

Execute 

Actual Settlement: Projects/WBS Elements/Networks

STEP 4

1. Check to see if there are error messages
2. Click on  to display messages

Actual Settlement: Projects/WBS Elements/Networks Basic list

2

Selection

Selection Parameters	Value	Name
Selection variant	7418_CLOSING	7418 WBS elements
Period	009	
Posting period	009	
Fiscal Year	2015	
Processing type	1	Automatic
Posting Date	30.09.2015	
Controlling Area	2026	Rhodia Asia Pacific
Currency	USD	United States Dollar
Value date	30.09.2015	

Processing Options

Selection Parameters	Value
Execution type	Settlement executed
Processing mode	Test run

Processing completed with errors

Number of me.	Max. message type	Error messages	Warning messages	Information messages
1	1	1		

Statistics

Processing category	Number
Settlement executed	
No change	58
Not relevant	19
Inappropriate status	51
Error	1
Total	129

STEP 5

For messages with a red circle , it means that there are some errors in the settlement, which must be corrected.

- Complete Allocation Structure
- KD205 - Maintain the settlement rule of the sender

STEP 6

Once all error messages are cleared, re-open transaction CJ8G and uncheck the test mode

and execute 

Actual Settlement: Projects/WBS Elements/Networks

Selection variant: 7418_CLOSING

Parameters

Settlement period: 9 Posting period: 9
 Fiscal Year: 2015 Asset Value Date:
 Processing type: Automatic

STEP 1

To check if WBS orders are settled, use the report **Z1K_SOLDE_WBS**

Look for a variant with 

STEP 2

Double click on the variant you want or select it and click on 

STEP 3

Enter the period and execute 

When the report doesn't display a value in the column 'solde' the WBS elements are completely settled in the selected period.

Example of a WBS element that is not balanced

STEP 1

To check if WBS orders are settled, use the transaction CJ13 and choose database profile « ZRCS00000001 »

STEP 2

Insert « * » to select all projects
