- [Going further with Fixed costs reports](#)

## Create a fixed costs report

 This workbook gives the detail of all cost centers CBS & GBU.

### Access the workbook

The workbook to be used is **BW\_WBK\_OSC\_0001 - ONE SYENSQO - Cost center Analysis**

=> Go to Analysis for Office in excel

=> Click "Open Data Source"

Go to the tab "Role" and open the folder FC - GBU Fixed Cost

Double-click on the workbook **BW\_WBK\_OSC\_0001 - ONE SYENSQO - Cost center Analysis** to open it

### Open the workbook

It is mandatory to enter

- the conso view (1): by default, it is recommended to enter **0**
- the cost center perimeter (2): by default, it is recommended to enter **1**
- Fiscal Year/Period (5): **MMM.YYYY**

To avoid authorization issues, enter:

- the authorization scope (3): **ECO** ([PO2 - BW - Authorization scopes](#)).

It is also recommended to enter at least a GBU, a company code or a plant code (4)

It is also possible to enter:

- a target currency (7) for conversion. By default the exchange rate type is C but you can change it and replace by CAR3. (P & L - Exchange rates)
- Variable Cost (6): you can include or exclude variable costs in your report. The determination of variable costs is based on **Mixed Cost Center**. By default variable costs are excluded with != X

Click "OK"

## Set-up a basic report

### Production fixed costs

In this example, the aim is to build a fixed costs report for the production plant Collonges (7622) in January 2024.

Enter in the prompt

- Fiscal Year/Period (5): **001.2024**
- Responsible Plant (4): **7622**

\* Conso. view -> 0=No/2=ECO/3=SCO 0

\* Cost center perimeter ? (1=Yes/0=No) 1

Auth Scope on Resp Cost Center (Auth with input) = ECO

\* Fiscal Year/Period (Selection Option) = 001.2024

Responsible Plant (Resp cost center) = 7622

Variable Cost (excluded by default) != X

\* Exchange rate type C

When you start working with the workbook, you see by default

- All cost centers
- All type of postings: fixed costs, depreciation, COPA

| Responsible Cost Center | Actual                  | Depreciation | COPA | Fixed Costs | Variable Costs | Total                   |
|-------------------------|-------------------------|--------------|------|-------------|----------------|-------------------------|
| 7622-1110               | 111 666,34 EUR          |              |      |             |                | 111 666,34 EUR          |
| 7622-1120               | 105 460,27 EUR          |              |      |             |                | 105 460,27 EUR          |
| 7622-1210               | 211 420,83 EUR          |              |      |             |                | 211 420,83 EUR          |
| 7622-1220               | 337 673,38 EUR          |              |      |             |                | 337 673,38 EUR          |
| 7622-1230               | 171 978,05 EUR          |              |      |             |                | 171 978,05 EUR          |
| 7622-1240               | 532 828,24 EUR          |              |      |             |                | 532 828,24 EUR          |
| 7622-1250               | 11 727,15 EUR           |              |      |             |                | 11 727,15 EUR           |
| 7622-1251               | 76 804,59 EUR           |              |      |             |                | 76 804,59 EUR           |
| 7622-1252               |                         |              |      |             |                |                         |
| 7622-1253               | 77 330,64 EUR           |              |      |             |                | 77 330,64 EUR           |
| 7622-1254               | 59 247,91 EUR           |              |      |             |                | 59 247,91 EUR           |
| 7622-1300               | 66 552,11 EUR           |              |      |             |                | 66 552,11 EUR           |
| 7622-2401               | 0,00 EUR                |              |      |             |                | 0,00 EUR                |
| <b>Total</b>            | <b>1 762 689,51 EUR</b> |              |      |             |                | <b>1 762 689,51 EUR</b> |

In order to filter Production fixed costs of the site, we must

- Exclude depreciation & COPA cost elements
- Filter production cost centers

Click the button "display" to show the "Design Panel"

1. Filter ZCBS group 2 Function = EPRD (=production cost centers)
2. Exclude cost elements groups
  - ZSO-29993
  - ZSO-29993B
  - ZSO-IND31
  - ZSO-IND41
  - ZSO-IND42
  - ZSO-IND51

You can watch the video to see how to do it.

Your browser does not support the HTML5 video element

### How to understand the report

Once you have filter the production cost centers and excluded non fixed costs cost elements, look at the total "Actual - Destination"

| Responsible Cost Center | Actual - Destination (Conv) | Actual - Destination (Local) |
|-------------------------|-----------------------------|------------------------------|
| 7622-1110               | 111 666,34 EUR              | 111 666,34 EUR               |
| 7622-1120               | 105 460,27 EUR              | 105 460,27 EUR               |
| 7622-1210               | 211 420,83 EUR              | 211 420,83 EUR               |
| 7622-1220               | 337 673,38 EUR              | 337 673,38 EUR               |
| 7622-1230               | 171 978,05 EUR              | 171 978,05 EUR               |
| 7622-1240               | 532 828,24 EUR              | 532 828,24 EUR               |
| 7622-1250               | 11 727,15 EUR               | 11 727,15 EUR                |
| 7622-1251               | 76 804,59 EUR               | 76 804,59 EUR                |
| 7622-1252               |                             |                              |
| 7622-1253               | 77 330,64 EUR               | 77 330,64 EUR                |
| 7622-1254               | 59 247,91 EUR               | 59 247,91 EUR                |
| 7622-1300               | 66 552,11 EUR               | 66 552,11 EUR                |
| 7622-2401               | 0,00 EUR                    | 0,00 EUR                     |
| <b>Total</b>            | <b>1 762 689,51 EUR</b>     | <b>1 762 689,51 EUR</b>      |

It should be exactly the same amount as what you see in the P&L (KE 30 - Profitability report), value field **E01 Period fixed costs** for the same selection (Period & plant)

**i** In case of discrepancies go to **FC - What are the main sources of discrepancies?**

## SG&A

In this example, the aim is to build a SG&A report for the GBU Silica in Rhodia Operation (ZFR3) in January 2024.

Enter in the prompt

- Fiscal Year/Period (5): **001.2024**
- BFC - GBU (4): **SI**
- Company code: **ZFR3**

In order to filter SG&A costs, we must

- Exclude depreciation & COPA cost elements
- Filter SG&A cost centers (2 Function = EADM & EMSV)

### How to understand the report

Once you have filter the SG&A cost centers, look at the total "Actual - Destination"

\* Conso. view -> 0=No/2=ECO/3=SCO

\* Cost center perimeter ? (1=Yes/0=No)

Auth Scope on Resp Cost Center (Auth with input)

BFC GBU - Resp Cost center (Opt. Auth)

\* Fiscal Year/Period (Selection Option)

BFC Geo/Zone (Selection Opt. Optional)

Company code (Selection Option, Optional)

| 2 Function | Cost Center                    | Actual - Destination (Local) |
|------------|--------------------------------|------------------------------|
| EADM       | ZFR3-6001 SILICA HQ            | 20 043,38 EUR                |
|            | ZFR3-6005 SILICA FINANCE       | 1 559,61 EUR                 |
|            | ZFR3-6006 SILICA DG            | 29 567,81 EUR                |
|            | ZFR3-6156 SILICA Direction opé | 181 192,61 EUR               |
|            | ZFR3-6159 SILICA Etudes        | 57 020,45 EUR                |
|            | <b>Result</b>                  | <b>290 183,86 EUR</b>        |
| EMSV       | ZFR3-6003 SILICA Supply Chain  | 77 012,41 EUR                |
|            | ZFR3-6158 SILICA Marketing     | 44 469,55 EUR                |
|            | ZFR3-6237 SILICA Zone Europe   | 177 158,89 EUR               |
|            | <b>Result</b>                  | <b>298 640,85 EUR</b>        |
|            | <b>Result</b>                  | <b>588 824,71 EUR</b>        |

It should be exactly the same amount as what you see in the P&L ( KE 30 - Profitability report ),

- 2 Function = EADM = value field **I25 G&A Adm.Expenses** for the same selection
- 2 Function = EMSV = value field **I15 G&A Com.Expenses** for the same selection

**i** In case of discrepancies go to **FC - What are the main sources of discrepancies?**

If there is no discrepancy you can build a report using the field you want.

## Set-up a detailed report

when you have a good understanding of the report, you can add additional information in the report. You can refer to the list [FC - Characteristics](#) to have a definition of each dimension available in the report.

## What are the main sources of errors?

**i** What are the main sources of discrepancies between the BW fixed cost request and the P&L?

## Allocation of a cost center to a GBU in a BW Fixed costs report

To ensure reliable fixed cost reporting, it is essential to include cost centers in the ZCBS hierarchy while adhering to the rules.

### Key rules:

#### 1. Production fixed costs:

- All production cost centers must be included in a ZCBS node that starts with **EPRD**.
- Cost centers allocated to both variable and fixed costs must be included in a node ending with **Y** (only in PF1).

#### 2. SG&A CBS:

- All CBS cost centers must be included in a node starting with **ZCBS** (**SCBS** for Syensqo).

#### 3. SG&A GBU:

- All GBU cost centers must:
  - Be allocated to an **EADM** node if they are administrative.
  - Be allocated to an **EMSV** node if they are commercial.

All other rules are detailed here: [Rules - Cost Center ZCBS hierarchy](#)

- [Allocation of a cost center to a plant in a BW Fixed costs report](#)
- [How can an error in the cost center's master data lead to an error in a BW fixed cost report?](#)
- [What must be done to correct an inconsistency ?](#)
- [What is the impact of the correction on historical data ?](#)

## Allocation of a cost center to a plant in a BW Fixed costs report

- In BW, the determination of the cost center's plant is done with its [Profit Center](#)

The field "Department" of the profit center is a critical field that is used in BW to assign a cost center to a plant and then to a site.

ex:

- The cost center 7512-1022 is assigned to the profit center 7512-10449
- The department of the profit center 7512-10449 is 7512

=> The cost center is assigned to the plant 7512

Depending on the type of profit center the department code can be:

- a plant code = a code maintained in table T001W in WP1 or PF1 (1)
- a generic plant code (only in WP1) created by GBU (2). This code doesn't exist in the table T001W.

## Rule by ERP + type of profit center

| ERP | Type of profit center                   | Department | Example |
|-----|-----------------------------------------|------------|---------|
| PF1 | <a href="#">Reporting profit center</a> | = "blank"  |         |

Organizational profit center

= plant code

By default the department code = profit center code without the letter C

However the rule is to have one department code by site even if for historical reasons there can be several profit centers in the same site.

ex: in Tavaux, all profit centers are assigned to the department TAU:

| Profit center               | Department |
|-----------------------------|------------|
| CTAH Slvr-Fr /Tavaux (Spc)  | TAU Tavaux |
| CTAU Slvr-Fr /Tavaux (Pvdc) |            |

There is one exception when there are several management units / GBU in the site (only in GBU Soda Ash).

In the GBU Soda Ash, there should be one dedicated department for Soda Ash another one for Bicar.

ex: in Torrelavega

| Profit center                    | Department                      |
|----------------------------------|---------------------------------|
| CTOS Slvr-Es /Torrelavega (Su)   | TOSA (management unit Soda Ash) |
| CTOSA Slvr-Es /Torrelavega (Sod) |                                 |
| CTOSB Slvr-Es /Torrelavega (Bir) | TOSB (management unit Bicar)    |

## How can an error in the cost center's master data lead to an error in a BW fixed cost report?

The allocation of a cost center to the P&L is not handled in the same way in the P&L and the BW fixed cost report. Naturally, if the two methods are not consistent, this creates a discrepancy between the two reports.

As a reminder, the allocation of a cost center to the P&L is done through an assessment cycle. In contrast, in BW, the allocation is based solely on the cost center's master data.

### Example:

In the fixed costs report, the cost center 4002-1100 is reported in the plant 4002 but in the P&L the same cost center is reported in a non allocated plant.

## What must be done to correct an inconsistency ?

The cost center 4002-1100 is allocated to the plant 4002 via its profit center but is not allocated to a plant via its assessment cycle, the following steps can help address this inconsistency:

1. Analyze the Business Rules:
  - Determine which plant allocation is correct
2. Adjust Master Data or Cycle Configuration:
  - If the profit center is incorrect, request the update of the cost center's master data: [Request the creation / update of Master Data](#)
  - Alternatively, if the assessment cycle is not correct, request the update of the assessment cycle in [Service One](#).

## What is the impact of the correction on historical data ?

Once the change is made, the historical data will be impacted in the following ways:

- In BW fixed costs query: when you update the master data of a cost center, historical data are reallocated to the new plant.
- In the P&L, if you update the assessment cycle of a cost center, it will only impact the future but historical data is not impacted. If there is a need to correct historical data, a manual correction in COPA should be done. It has to be requested in [Service One](#).

- [Allocation of a cost center to a GBU in a BW Fixed costs report](#)
- [The fixed costs report is available by GBU.](#)
- [How can an error in the cost center's master data lead to an error in a BW fixed cost report?](#)
- [What must be done to correct an inconsistency ?](#)
- [What is the impact of the correction on historical data ?](#)

## Allocation of a cost center to a GBU in a BW Fixed costs report

The fixed costs report is available by GBU.

In the BW fixed costs query a cost center can only be allocated to one GBU.

- When it is a cost center in WP1, the determination of the GBU is done with its [Profit Center](#)
- When it is a cost center in PF1, the determination of the GBU is done with its [Business Area](#)

## GBU determination in WP1

The determination of the GBU in WP1 is done with the [Profit Center Standard hierarchy](#)

Profit Center: CNRA COMMUN NHA

2. The business area belongs to Corporate Business Services

### How to allocate a business area to a GBU?

[Rules - PF2 - Business Area](#)

3. In the fixed costs report, the cost center SM16210000 is allocated to Corporate Business Services

## How can an error in the cost center's master data lead to an error in a BW fixed cost report?

The allocation of a cost center to the P&L is not handled in the same way in the P&L and the BW fixed cost report. Naturally, if the two methods are not consistent, this creates a discrepancy between the two reports.

As a reminder, the allocation of a cost center to the P&L is done through an assessment cycle, allowing it to be allocated to multiple GBUs. In contrast, in BW, the allocation is based solely on the cost center's master data (profit center or business area) and is assigned to a single GBU.

### Example:

In the fixed costs report, the cost center TK19300000 is reported in the GBU Peroxides but in the P&L the same cost center is reported in the GBU Special Chem ?

[KS03 - Display cost center](#)

4. The cost center TK19300000 is allocated to the profit center D7630 which belongs to the GBU Special Chem

**How to allocate a profit center to a GBU in PF1?**

[Rules - PF1 - Profit center](#)

## What must be done to correct an inconsistency ?

The cost center TK19300000 is allocated to Peroxide via its business area and to GBU Special Chem via its assessment cycle, the following steps can help address this inconsistency:

1. Analyze the Business Rules:
  - Determine which GBU allocation via business area or via cycle is correct
2. Adjust Master Data or Cycle Configuration:
  - If the business area is incorrect, request the update of the cost center's master data: [Request the creation / update of Master Data](#)
  - Alternatively, if the assessment cycle, request the update of the assessment cycle in [Service One](#).

## What is the impact of the correction on historical data ?

Once the change is made, the historical data will be impacted in the following ways:

In BW fixed costs query: when you update the master data of a cost center, historical data are reallocated to the new GBU.

In the P&L, if you update the assessment cycle of a cost center, it will only impact the future but historical data is not impacted. If there is a need to correct historical data, a manual correction in COPA should be done. It has to be requested in [Service One](#).

## How-to group members

How can you create your own groups of ZCBS (cost centers) or ZSOLV (cost elements)

## How to create a group of cost elements in a workbook

Example: you want to create your own group of cost elements:

- Labor
- Maintenance
- Others

The ZSOLV cost elements group is too detailed for your need, to you need to group some of the ZSOLV groups

1. Select one or more cost elements you want to group

| Cost Element | Actual - Destination (Local)       |

## Going further with Fixed costs reports

### Going further with Fixed costs

- [FC - Create a fixed costs report](#) — This page explains how you can create step-by-step a fixed costs report.
- [FC - ONE SYENSQO - Cost center Analysis](#) — This workbook gives the detail of all cost centers CBS & GBU.

- [FC - Characteristics](#) — List of Characteristics & Measures available in the BW Fixed costs application with the link to more detailed documentation when it exists.
- [FC - Methodology to create a fixed costs report](#)
- [FC - What are the main sources of discrepancies?](#) — What are the main sources of discrepancies between the BW fixed cost request and the P&L?
- [FC - Cost centers master data](#) — This page explains how you can display cost centers master data. It is a useful tool for preparing and validating master data to ensure the accuracy of fixed costs reports.
- [FC - Fixed costs report - P&L impact](#) — The P&L impact fixed costs query is used when a cost center is shared with several GBUs
- [FC2 - Fixed costs \(obsolete\) \(WBP\)](#) — This page explains how the application FC2 - Fixed costs was replaced by the application FC - GBU Fixed costs.
- [FC - How-to group members](#) — How can you create your own groups of ZCBS (cost centers) or ZSOLV (cost elements)
- [FC - Internal Orders master data](#) — This page explains how you can display CO orders master data. It is a useful tool for preparing and validating master data to ensure the accuracy of fixed costs reports.
