1. Objective and Scope

1.1. Objective of this Operation

The aim of this document is to provide an operational guide for the SAP/R3 ERP PF1 environment concerning the management of bank accounts for the booking of the direct debits receipts from BBVA.

1.2. Scope

This procedure is applicable for the following company:

- **0245** - SOLVAY QUIMICA (ES)

For the bank account in BBVA:

- SOLVAY QUIMICA, S.L. - ES1501824649840010018672

2. Definitions

See Finance Glossary:

- CAM
- ERP
- PF1

3. Tasks description

3.1. Periodicity

This procedure must be done every 10 days on the 1st, 11th and 21st of each month.

3.2. I extract bank statements from BBVA Netcash

To have access to the bank statements enter in the web site of [BBVA - Net Cash](#).

To login use the credentials as mentioned in the file "[BANK AND OTHER ACESSES ES-PT-UK](#)".

Once inside the BBVA bank choose:

- Información de Cuentas
- Módulo de tesorería

Módulo de tesorería

The screenshot shows a web form titled "SELECCIÓN DE FICHEROS" within the "Módulo de tesorería" section. The form has three main sections: "ESTADO" with radio buttons for "Pendientes" and "Histórico" (selected); "RANGO DE FECHAS (DD/MM/AAAA)" with input fields for "Desde: 01 / 03 / 2013" and "Hasta: 10 / 03 / 2013"; and "TIPO DE FICHEROS" with a dropdown menu set to "TODOS". An "ACEPTAR" button is located at the bottom of the form.

Once the page is displayed choose:

- "Estado" – Histórico
- "Rango de fechas" – Every 10 days: if we are at beginning of the month (01) from 21 to 31 of M-1; at 11th – from 01 to 10 of M+1; at the 21th – from 11 to 20 of M+1
- "Tipo de ficheros" – TODOS (always)

Afterwards it will ask you to choose the files we want to extract.

3.3. I perform the processes for Torrelavega

Once you have the file with the bank movements go to SAP and enter in transaction ZE1FGESTRECIBOS.

- Once inside we must choose TORRELAVEGA process and:

Select **File upload Receipts Bank from Torrelavega** and execute the transaction .

It will display another screen where you will just have to select the path to the file downloaded from the bank and execute:

Once done you will receive the details of the movements that will be posted:

There is a brief check that can be done to ensure that there is missing information to post. If you look to the column highlighted in red you can see that for some lines there is no reference to an account. If this happens go to "What to do in case of missing allocation?".

- Select **Post Receipts from Table ZEFRE Torrelavega**

Select the process to execute

The transaction generates batch inputs that have to be processed in **SM35**. Normally the batch codification is similar to ZES-REC-ACRE and / or ZES-REC-GRAL.

Go to **SM35** and process the batch.

STEP 1

Use transaction code: **SM35**

i SM35 - Batch Input: Initial Screen

i Batch input is a SAP interface that allows you to transfer large amounts of data to an SAP system. You can use batch input to transfer legacy data and perform periodic imports of external data.

i A batch input session is a sequence of transactions supplied with user data by a program. SAP stores these transactions on a stack until you decide to process them online. No database updates are performed until the session has been processed. Using this technique, you can transfer large amounts of data to SAP in a short time.

STEP 2

Look for the batch input session to be processed

i If you don't know the session name you can run this transaction using the "Selection criteria" in the top of the screen.

These selection criteria can be combined in order to strengthen the list of batch input sessions.

Selection by

- *Session:* where you can insert the session name you are looking for

- *Period:* where you can insert the period for which the batch was created

- *Created By:* where you can insert the user who created the batch input session

STEP 3

Select the batch input session to be processed

After you find the session, select the line with the batch input that you want to run:

Session name	Stat	Created By	Date	Time	Creation Prog	Lock Date	Authorizat	Tra

STEP 4

Start processing by clicking on

STEP 5

Check the status of the batch input session

Double click over the session.

3.3.1. I perform the changes in case of missing allocation

If the direct debit movement doesn't have account to be posted, please follow the following steps:

- 1) There are some lines that we know should not be posted via this transaction. So, whenever you see reference to "IA.*****" this has to be ignored. To maintain the table with only the relevant movements you can go to:

PROCESS MANAGEMENT TABLES RECEIPTS (ZEFRE And ZEFTE)

- Table ZEFTE Maintenance with Texts of the Receipts
- Table Maintenance ZEFRE with receipts to post

In this table you have the list of movements uploaded from the bank, if you need to ignore the movements search for them and just add an "X" in the last column. The program will consider it already posted and skip it for posting.

Change View "TABLE TO ACCOUNT RECEIPTS": Overview

2) Check if it is something new - you can search for a familiar concept or vendor name in BBVA site;

3) Search in SAP transaction FK03 for the vendor number (you can search by name or ID acreedor), if it is not clear or available or if vendor is not created please report it to CAM;

In the previous example shown, we see in table ZEFRE that the program reads the last 5 digits of the Id acreedor (+4 blank) digits: "5400B".

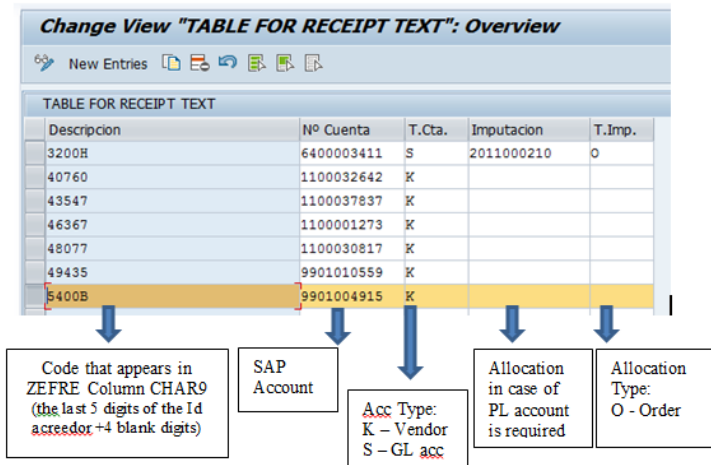

So you just need to add an entry in table ZEFTE:

PROCESS MANAGEMENT TABLES RECEIPTS (ZEFRE And ZEFTE)

Table ZEFTE Maintenance with Texts of the Receipts

Table Maintenance ZEFRE with receipts to post

Taking in consideration the following:

As soon as it's completed save the changes in the table and future movements will automatically filled and posted.

For the movement already uploaded and available in the table, you can manually add the account before processing the batch input.

End of document.
