

Distribution cycles - PF1

In PF1, distribution cycles are used for IAS 19

When you create a cycle to distribute corporate IAS19 costs in PF1, you must follow the following steps:

STEP 1

Create a distribution cycle with KSV 1 - Create Actual Distribution Cycle

1. Cycle = CCCCDV
2. Start Date = 01.01.20YY to 31.12.20YY
3. Text = Distribution (IAS19)

The screenshot shows the SAP PF1 form for creating a distribution cycle. The Controlling Area is 'CHEF ERP SOLVAY'. The Cycle is '0001DV' (marked with 1), and the Status is 'Saved'. The Start Date is '01.01.2024' (marked with 2) and the To date is '31.12.2024'. The Text is 'Distribution (IAS19/Insurance)' (marked with 3). The Indicators section has 'Iterative' checked and 'Cumulative' and 'Cumulated Opt' unchecked. The Field Groups section has 'Consumption' and 'Transaction Curren' unchecked, while 'Object Currency' is checked.

STEP 2

Only one segment needs to be created

1. Segment name = EE800IAS19
2. Segment description = IAS 19 BFC Dotation
3. Sender values =
 - Sender rule: Posted amounts
 - Share in %: 100
 - Act. vals
4. Receiver tracing factor
 - Receiver rule: Variable portions
 - Var.portion type: Actual costs
 - Scale Neg. Tracing Factors: No scaling
5. Sender cost center = EE 800IAS19
6. Sender cost elements group = ZSO-P20010
7. Receiver cost centers group = E_CCCC (= all cost centers of the company)

The screenshot shows the 'Segment Header' form in SAP PF1. The Controlling Area is 'CHEF ERP SOLVAY'. The Cycle is '0001DV' and the Segment Name is 'SM800IAS19' (marked with 1). The Segment Description is 'IAS19 BFC Dotation' (marked with 2). The Sender values section has 'Sender rule' set to 'Posted amounts' (marked with 3) and 'Share in %' set to '100,00 %'. The Receiver tracing factor section has 'Receiver rule' set to 'Variable portions' (marked with 4) and 'Var.portion type' set to 'Actual costs'.
