

Rules - Material Production Version

Definition

Key that determines the production version which is used to determine the quantity structure for the cost estimate.

A production version is used to calculate the cost estimate when :

- the procurement type is **E** In-house production (MRP2 view)

Click on "Versions" to display the list of existing production version. If there is no version available, the cost estimate cannot be calculated.

The screenshot shows the 'Quantity structure data' section of an SAP interface. It includes fields for 'Alternative BOM', 'Group', 'Task List Type', 'SpecProcurem Costing', 'Co-product', 'Fxd Price', 'Version Indicator', and 'Production Version' (set to 'KS13'). A 'Versions' button is visible. An overlay window titled 'Production Version Overview' is open, displaying a table with columns 'Ve...' and 'Text'. The table contains two rows: 'KS13 A 205F NATURAL 25' and 'SAD1 TY A 205F NATUREL 25'. A blue arrow points from the 'Versions' button to the table.

Ve...	Text
KS13	A 205F NATURAL 25
SAD1	TY A 205F NATUREL 25
