

I Control of FI-GL and FI-MM

Process: Monthly costing and cost accounting closing

Responsibility area: Perform product costing monthly closing

 This procedure describes the check between the Module Material Management (MM) and Module FI.

The check is performed on a monthly basis, on D+2 after all postings are performed (when MMRV transaction is already close) and before the BFC stocks upload for both systems.

For PF2:

Once the report is displayed, check the values in column variance. If the amount is different to zero column this means that there is a difference between FI and MM. This check should be done for all stock accounts (check page down until the end of the report).

In this example we have a difference in account 2000010000 of **99.331, 00 €**.
