## Reverse of the Product Costing

In case of the need to reverse product costing, we should start reversing the transactions from the end to the beginning.

We only need to reverse the transaction that have this option:

KK88 (For the companies using production orders, the transaction is CO88)  
KKP5  
KKPX

KKN1 (For the companies using production or process orders, the transaction is CON2)

KSII and KKS2 is not possible to reverse.

### Important:

After performing the reverse of the necessary transactions we must re-run the product costing process according with the sequence explained in **Responsibility area: Perform product costing monthly closing**

All transactions must be executed again, even the ones that haven't been reversed (KSII and KSS2). The system recalculates the related figures without having the need to reverse these steps of the process.

## Guideline

To be performed after KSS2

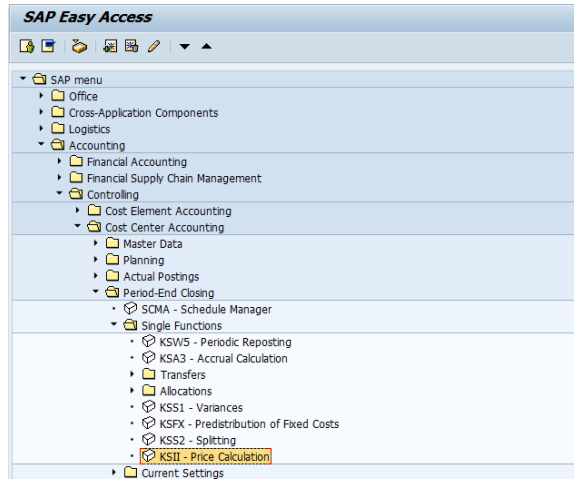

- Based on KSS2, KSII calculates the actual price for the activities ZF\* and ZZ\*.
- The actual costs posted on each production cost center are splitted by the actual quantities, for all activity types.
- Until the end of this transaction no postings are done.

STEP 1

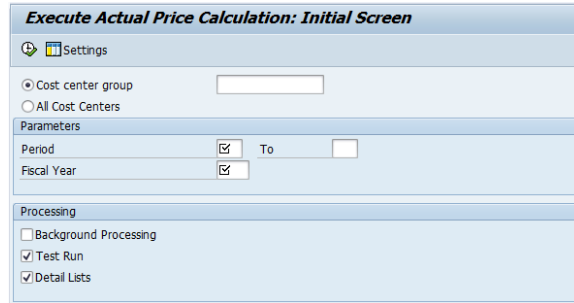

Start the transaction using the menu path or transaction code **KSII**

Double-click

**KSII - Price Calculation**

**i** Execute Actual Price Calculation: Initial Screen

**STEP 2**

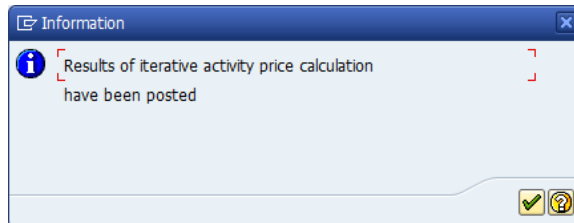

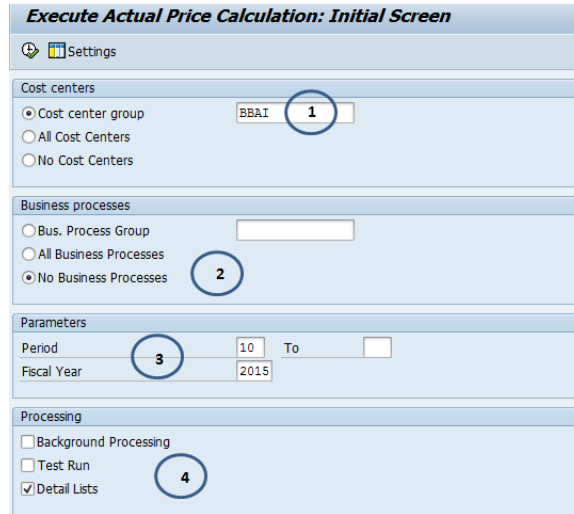

1. Enter a cost centers group or use a variant

**!** Never mark "all cost centers"

2. Mark "No business processes"
3. Enter the closing period and the fiscal year
4. Unflag "Test Run" and keep "Detail Lists"

Execute

An information frame appears. Go ahead with

**STEP 3**

**A list is generated**

The list shows the result of the operation.

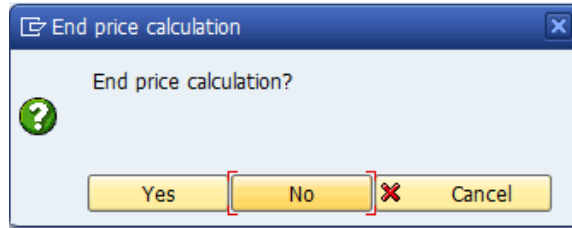

Cost Ctr	ActTyp	Activity Quantity	Total price	Price (Fixed)	PUnit
D332482500	ZZPROD	372.593	3,050.45	3,050.45	100
D332482600	ZZPROD	372.593	9,468.53	9,468.53	1000

The control cost by activity type, determined in step 1, are divided by the actual activity quantities and the result shows the actual prices per activity type.

Planned prices for the activities are not shown here.

Click on  to leave the transaction

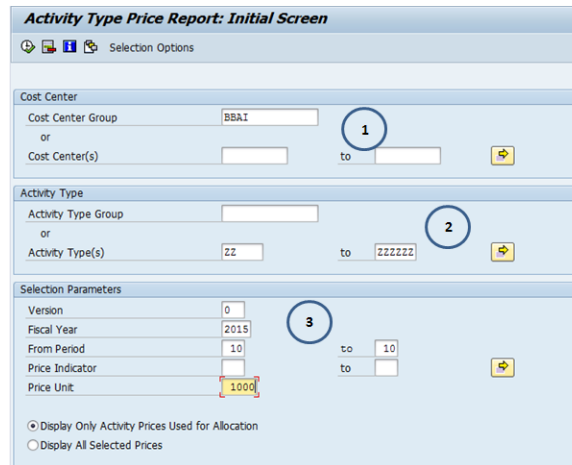

A message is displayed to end price calculation. Click on

**STEP 1**

**Check the activity rates with the transaction KSBT**

1. Enter the cost center group:  
For PF1 same as in KSII  
For WP1 PPPP-1
2. Enter a range of activity types (for PF1)
3. Enter the version '0'
4. Enter the Fiscal Year and the Period
5. Enter price unit 1000
6. Mark 'display only activity prices used for allocations'

Execute 

**STEP 2**

**For PF1:**

The reports shows the actual and the planned activity price per cost center in 2 different lines:

In the last column the price indicator 'Pl' represents:

'3' = planned price

'5' = actual price

**For WP1:**

A report is displayed with the list of activity rates

**Activity Type Price Report: Overview Screen**

Cost Center Group: BBAI  
Activity Type: 22, 10, 222222  
Version: 0 Plan/Act - Version  
Fiscal Year: 2015  
Period: 9 To 9  
Price unit: 1000

In case of blocking error (they could delegate in IT), or solve directly in case of minor errors

Transaction KSII is not possible to be reversed. Please **never** reset KSII.

For recalculation of figures please just rerun again.
