

Insert a video in a Solvay One page

This page includes how to steps from importing to publishing media files in Keepeek.

Report any issues/clarify doubts to Web Contribution (Data) team [here](#).

[Keepeek tips](#)

If you import a video using Solvay One media feature only MP4 and MOV will load properly. Other formats will appear to be broken.

MP4

MOV

MV4

AVI

WMV

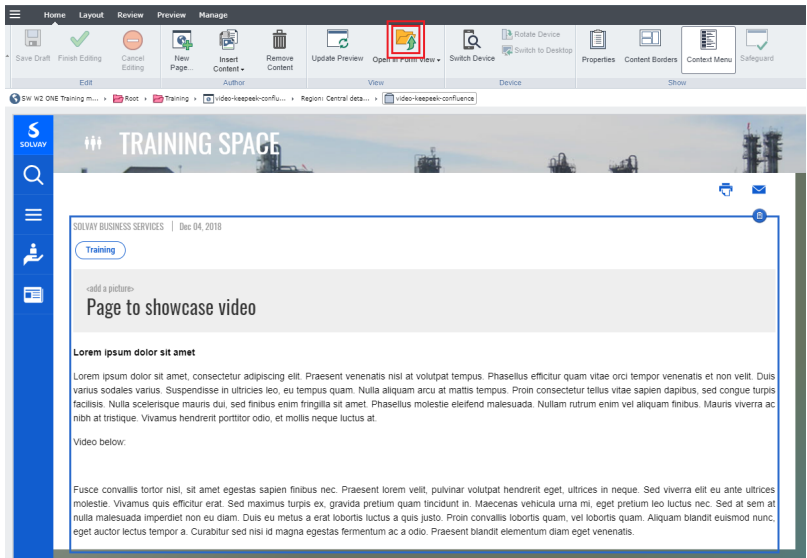

However if you embed the video from Keepeek directly, this should not be a problem!

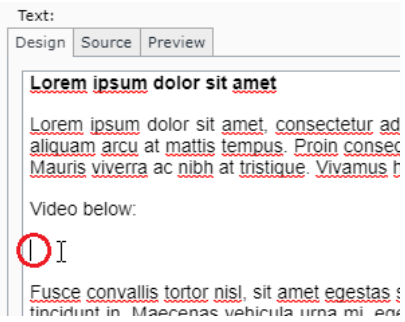

MV4

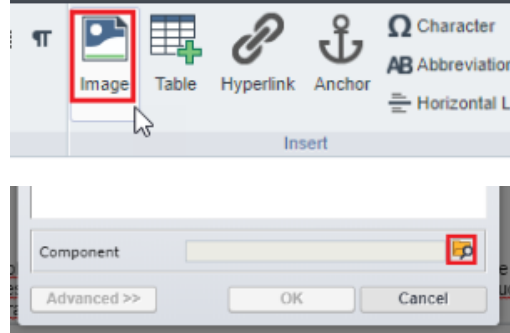

Open your Solvay One page, start Tridion and select the option to **open in form view**.

Click where you want to have the video placed.

Select the **Image** option and open the **media folder**.

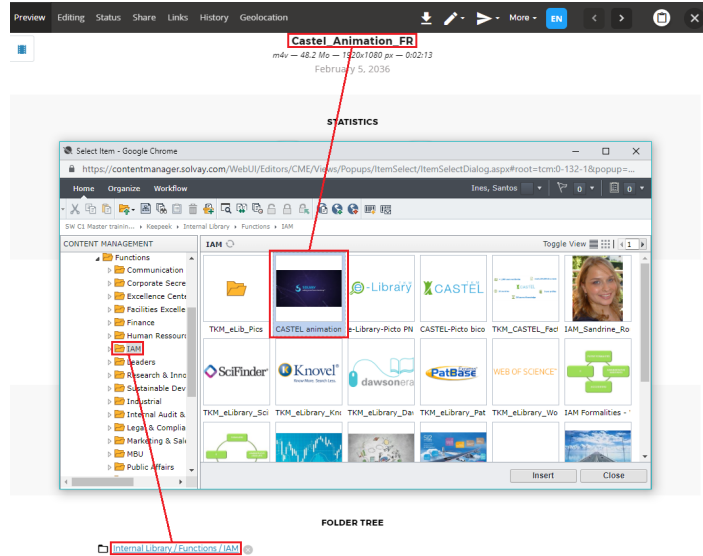

In Tridion follow the video's path to find the video, and insert it.

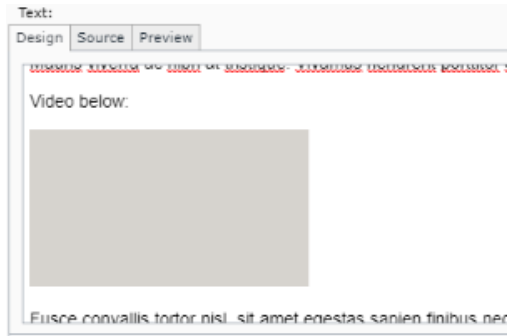

Note:

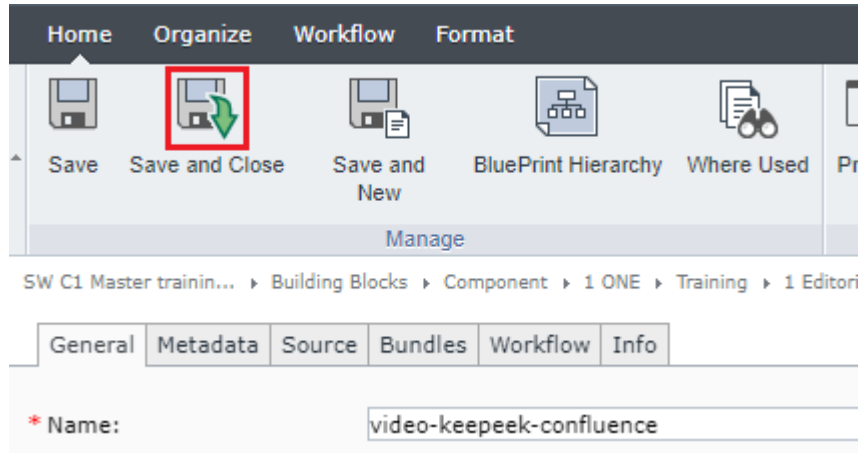

If you don't know the path, open Keepeek, find your video, enter preview mode and scroll down until "folder tree" section.

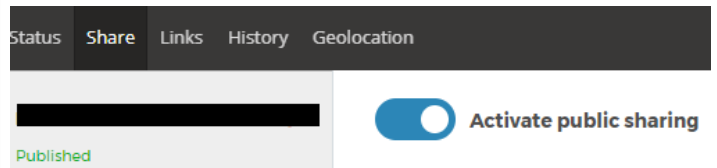

It's normal to appear a grey rectangle when inside Tridion form's view.

Click the **Save and close option** to see it in Tridion edit mode.

From Keepeek, find your video, go into **share tab** on the top menu, then activate the **public sharing** option.

Find **embed the video section** and **copy** the code (don't forget to **change the video's size** to fit correctly on your page - "custom size").

Embed the video

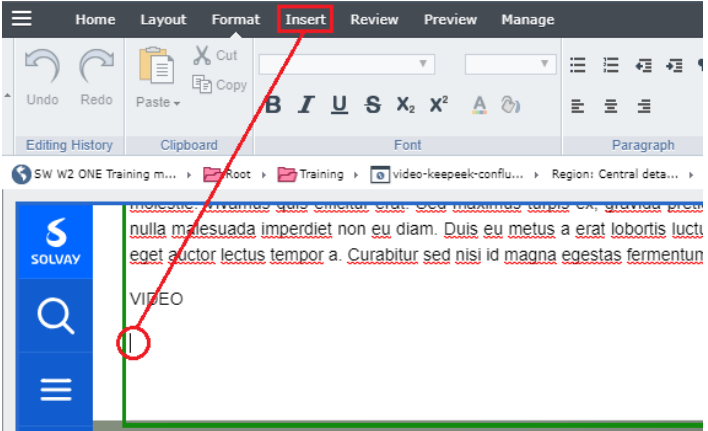

```
<iframe src="https://solway.keepeek.com/pmjUbeN6Ea" style="border: 0" width="1920" height="1080" frameborder="0" allowfullscreen></iframe>
```

Custom size **Automatic size**

Width px

Height px

In your page, **click** where you want to place the video, then in the **insert tab** at the top.

Select the option to insert external contents from an **embed code**, **paste** your Keepeek's video code and **save** (you can preview by clicking on **refresh** first).
