

Confluence: How to do mass upload of User 's in Confluence group

In some scenario's we receive tickets where the access has to be provided for bulk user's.

Step 1: Navigate to Group option in confluence

Step 2: Search for the group for which the user's has to be added.

Step 3: Click on Add members tab

Group Members: test

[« Back to Groups](#)

Add Members

User	Username	Email	
Gaetan Andria	gandriam	gaetan.andria-exterieur@solvay.com	
Anurekha Vijayaraghavan-Ext	inav1205	anurekha.vijayaraghavan-ext@solvay.com	
ru luaute-ext	rluaute	ru.luaute-ext@solvay.com	

Step 4: Add the member by providing their NT user ID seperated by Comma(,) between user's ID

Group Members: test

[« Back to Groups](#)

test

Add Members  Enter a comma separated list of user names to add users to this group

Step 5: By this way, we can add bulk users to any group in confluence.

Note: Add members by **NT user ID** and not with **User name** or **Email address**.
