

Complaint: Create a complaint

Overview

In this section, you will find information about how to create a complaint in Salesforce.com and about the interface between Salesforce.com and SAP. In particular, you will learn about:

- SAP integration flow and process based on the document type and number (Sales Order Number, Outbound Delivery Number or Shipment Number)
- The information to enter at complaint creation, such as Resolution Site, confidentiality, case currency, motive and sub-motive
- The roles or assignees of the persons / teams involved in the Complaints (e.g. originator, investigator, commercial assignee)
- The severity levels & the status of a complaint
- Customer contact information
- Order information, containment / immediate actions, etc.

In Salesforce.com, a Complaint is treated under the object called 'Case'. Cases can be used for the creation and management of Complaints, Customer Requests and Sample Requests.

Step By Step

SAP Integration

1

An interface exists between SAP and Salesforce to gather transactional data from Sales Order, Outbound Delivery or Shipment Numbers (Document Reference) from SAP to Salesforce*.

•The frequency of the pull is on-demand and as the pull happens when a user creates or updates a Complaint with a Document Reference.

Show 25 Items

If multiple Sales Order or Delivery Numbers exist for the same Complaint, multiple Complaints need to be created.

In most cases, a Complaint is linked to a Sales Order Number, to an Outbound Delivery Number or can be linked to a Shipment Number.

When creating a new Complaint providing one of these references is usually the first step during the registration.

•Let's follow **D**avid, working as a Sales Representative while he creates a new Complaint.

Under the Case tab, David clicks on **New** to create a new Complaint.

3

David now needs to select the Record Type for the Case.

•He has the choice between Complaint, Sample Request and Customer Request.

•David selects **Open Complaints** and clicks on **Continue**.

This will open the Complaint edit page.

New Case
Select Case Record Type
Select a record type for the Case. To skip this page in the future, change your record type settings on your personal setup page.

Select Case Record Type

Record Type of new record: **Open Complaint**

Record Type
Chose record type between available options.

Available Case Record Types

Name	Description
Customer Request	
Open Complaint	Changed label from "Open Case" to "Open Complaint" 8-2608

Case Record Types
All the available Case Record Types are referenced here with a description.

Continue **Cancel**

4

David now needs to select the Document Source (PF1 or WP1) and the Document Type (Sales Order Number, Outbound Delivery Number or Shipment Number).

Case Information (1-4)

1

The re are 2 different scenarios based on whether there is a document reference obtained from SAP.

Scenario 1	Scenario 2
Information is obtained from SAP: the following fields are auto-populated on the Case Information section.	Information is not available from SAP: the following fields are editable on the Case Information and are filled in manually.
- Ship-to Account - Sold-to Account - GBU	- Ship-to Account - Sold-to Account - GBU

2

The rest of the fields in this section need to be completed manually if required.

Motive and Submotive

The dependent fields Motive and Submotive have been changed from Lookup fields to dependent Picklists.

Dependent Fields x

Motive

Sub-Motive

The motive and sub motive describe about which aspect the customer is complaining. Motiv e and sub motive are not intended to describe the cause of the Complaint but only the « experience » of the customer.

•The Motive and Sub motives are inter dependent, mandatory and are as follows:

4

The screenshot shows a 'New Case' form with the following fields and values:

- Case Owner:** Filipe Freitas
- Ship To Account:** Click lookup icon...
- Sold To Account:** [Empty field]

•In our Case, both Investigator and Commercial Assigne will be managed automatically based on the GB U rules.

*
The field is Investigator and Commercial Assignee are only available on the creation. After, these roles should be managed directly on the Case Team section

Severity

- During the Complaint Registration step, David *needs* to fill-in the **Severity** of the Complaint. There are 4 types of Severity:
 - Critical**: Totally unacceptable situation.
 - Major**: Complaint with a big impact
 - Standard**: Complaint with a low impact
 - Anomaly**: Complaint with very low impact closed directly after registration
- If the Severity is defined as "Anomaly", then the Complaint should only be registered and not investigated. In that case, mandatory fields will only be required for the registration step. No further information is required for closure.
- By default, the Severity of a Complaint is set to « Standard » but remains editable.

The screenshot shows a form with several fields: Severity, Motive, Sub-Motive, and Confidential. The Severity field is highlighted with a red rectangle and has a dropdown menu open. The dropdown menu shows four options: Critical, Major, Standard (which is highlighted in blue), and Anomaly. The Motive field has a dropdown arrow, and the Sub-Motive field has a dropdown arrow. The Confidential field has a question mark icon.

Customer Complaint Severity Clarification

Risk	Impact	ON HSE, PRODUCT STEWARDSHIP	ON CUSTOMER PRODUCTION	ON SOLVAY FINISHED PRODUCT QUALITY	Internal investigation
CRITICAL Real unacceptable risk	Direct impact on safety and environment HSE -event on customers site (i.e. declared incident, leakage > 100 kg in storage)	Direct impact on customer production Production line stop Wrong product consumption	Use of product might cause severe damage or high risk Not predictable impurity (i.e. metal pieces) Microbiological contamination Unstable product	YES	
MAJOR Potential unacceptable risk	Potential impact on safety and environment Potential HSE-event due to bad labelling, packaging leakage Potential contamination in customer end product	Potential impact on customer production Production planning change Wrong product in inventory, but not used	Use of product might cause damage or risk Product out of specification Product out of typical properties	YES	
STANDARD Perceptible damage to incident	No impact on safety and environment Customs duty to pay Damaged packaging	No impact on customer production Later arrival of product, but inventory available	Use of product causes no risk Product has unusual aspect (i.e. color) Incorrect weight per bag	YES	
ANOMALY Observation; no risk	No impact on safety and environment Documentation problem (Safety Data Sheet)	No impact on customer production Later arrival due to incidental traffic conditions	Use of product causes no risk Documentation problem (i.e. Certificate of Analysis), Wrong price invoiced	NO

- The Status order is as follows:
- New:** As soon as the Complaint is created.
- Acknowledgement Sent:** When the acknowledgement email has been sent to the main Contact of the Complaint.
- Under Investigation:** During the investigation process.
- Customer Response Under Review:** Additional information requested or review after investigation process.
- Customer Communication:** When the Final Communication to the Customer is ready to be sent
- Completed:** When the Customer Response is sent
- Closed:** When the Complaint is closed.

Each status is linked to a step of the process.

Statuts Autocomplete

When the status changed to Completed the fields on sections Case information (except the fields Motive and Sub-Motive), Complaint Description, C Information are now locked and cannot be edited.

The effectiveness Assessment field is now editable at any stage of the Complaint, making the process more agile

•Changing the Status of the Complaint is a manual process for the following Statuses:

- **Under Investigation**
- **Under Review**

• Nevertheless, for the other Statutes, the values are automatically updated: **-New**
: Default status after creation of a Complaint.
