

Insert one or several image/video in a page (legacy)

Overview

Tridion Solweb sites allows to insert several photos in a page to constitute a photo gallery. It also is possible to insert one or more videos in a page. This step-by-step will show you how to proceed to get this done (consult the [Multimedia part of the 'Discovery' section to get examples](#)).

New media management system

The procedure described below is the legacy way. You currently can still use it, but you can also use the Solvay ONE [Manage Media](#). In the coming months, this legacy system is going to be turned off.

Table of contents

- [Can't find information?](#)

Pre-requisite: This guide considers that the concerned media are ever available in Tridion. Two other documents are available to get this done:

- [Multimedia formats \(Internet & Web factory\)](#)
- [\[Internet & Webfactory\] Upload a multimedia file \(Legacy\)](#)
