

SCE Dashboard - Activity

Transport Activity

In the SCE Dashboard, the Activity refers to the transport activity and not to the production one.

			# shipments and # containers	Net Weight and Gross Weight
			TIERS - Shipment status and events QVSCE_BW_QRY_MVSDTR01_0012	TIERS - Shipment costs detailed analysis QVSCE_BW_QRY_MVSDTR01_0010

Reference date:

Shipment completion date

KPI:

Number of Shipments & Number of Containers & Gross Weight & Net Weight

Comments:

Transport Mode: Main one of the shipment file

Multicontainers (9024/9025): because of the SAP structure, containers are counted twice if we don't filter on the Shipment Type. To correct this issue, we delete the Shipment Type "Approach Multi Cont." and we keep "Sea Export (multi)".

Shipment file

The Activity is calculated for each and every one shipment file present in TIERS. (Inbound and Outbound)

TIERS: Number of single shipment files (shipment operation assigned to one Forwarding Agent) Thus, it depends on each GBU process.
