

# SCE Dashboard - BW

			Inventory values
			Core query : BW_QRY_MVFIWC01_0005 QVWCAP_BW_QRY_MVFIWC01_0013
Global Filters	Period	Month Year	Data shown in column by Month Year
	Geography	Zone	Comp. Geo.zone [C_COMPDE__C_ZONE]
		Country	PRS Comp. Mgt country [C_COMPDE__C_MNGCTRY]
	Organization	GBU	1 - BFC GBU [C_SUBACT2__CPFCTR1_2]
		Legal Entity	Company code [C_COMPDE]
		BU	2 - BFC Group of activ. [C_SUBACT2__CPFCTR2_2]
		Site	Plant [C_PLANT] && Transcoding table Purchasing site vs Plant
Specific Filters	Inventory	BFC Account	BFC Account [0GL_ACCOUNT__C_MGN_ACC]
		WC Acct Sub Type	WC Acct Subtype [0GL_ACCOUNT__C_GL_STYP]
	Product	Material Division	Mat. Division [C_MATNR2__C_DIVISN]
		Commercial Product	Com. Prdt/PIF code [C_MATPNT2__C_PRODPIF]
		Product Hierarchy	Prdt Hierarchy [C_MATNR2__OPROD_HIER]

## KPI:

Inventory value

## Comments:

- BW versus [SCE Dashboard - Finance](#):

BW Inventory values are different from those given by [SCE Dashboard - Finance](#).

The 2 main reasons are : the organization perimeter (only SAP companies in BW and all companies even non SAP in Finance) and the CONSO adjustments.

- [BW Inventory values versus BW Inventories in volume](#):

BW Inventory values are not on the same perimeter as [BW Inventories in volume](#). All products are taken into account in BW Inventory values, even if they are not in BW Inventories in volume (because their weight can't be converted in KG).

- [Conversion rules](#): EUR / USD

The conversion from a local currency to EUR or USD is based on a fixed exchange rate. The rate applied on all inventory values (regardless of the inventory month) is the rate of the day of the last dashboard update.

### USD inaccuracy

For USD, we don't have all the exchange rates because it's not the official currency at Solvay (EUR).

So for the following countries: Argentina, Bulgaria, Egypt, Mexico, New Zealand and Switzerland, when selecting USD, the unit will not be USD but the local currency.
