

How to create a new Broadcast in SAP BO

To create a new Broadcast or Publication, always use **PUBPILOT** login in BI Launch pad.

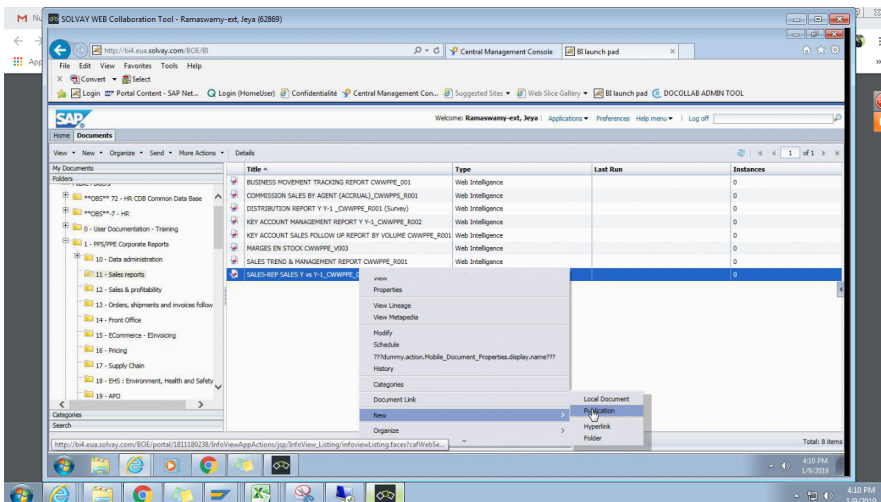

The image shows the SAP BusinessObjects BI launch pad login interface. It features a header with the SAP logo and the text "SAP BusinessObjects BI launch pad". Below the header, there is a login form with the following fields:

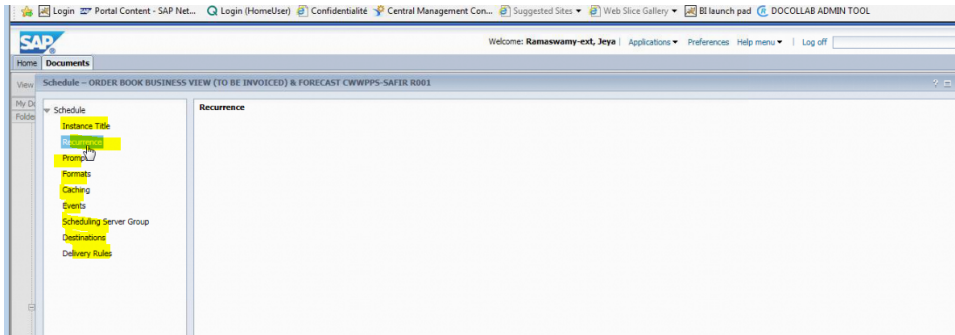

- System: WDCBIAP01:6400
- User Name: PUBPILOT
- Password: [masked with dots]
- Authentication: Enterprise

A "Log On" button is located below the form. At the bottom left is the SAP logo, and at the bottom right is a "Help" link.

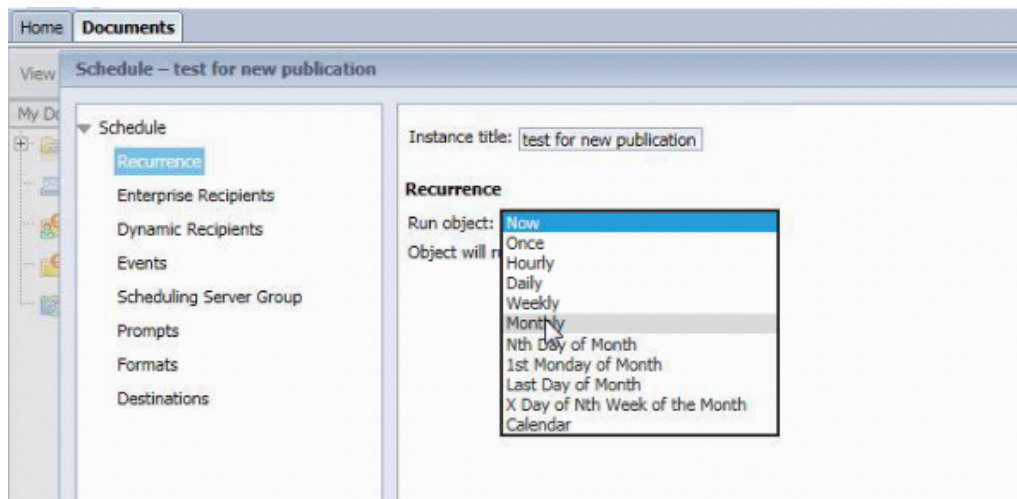

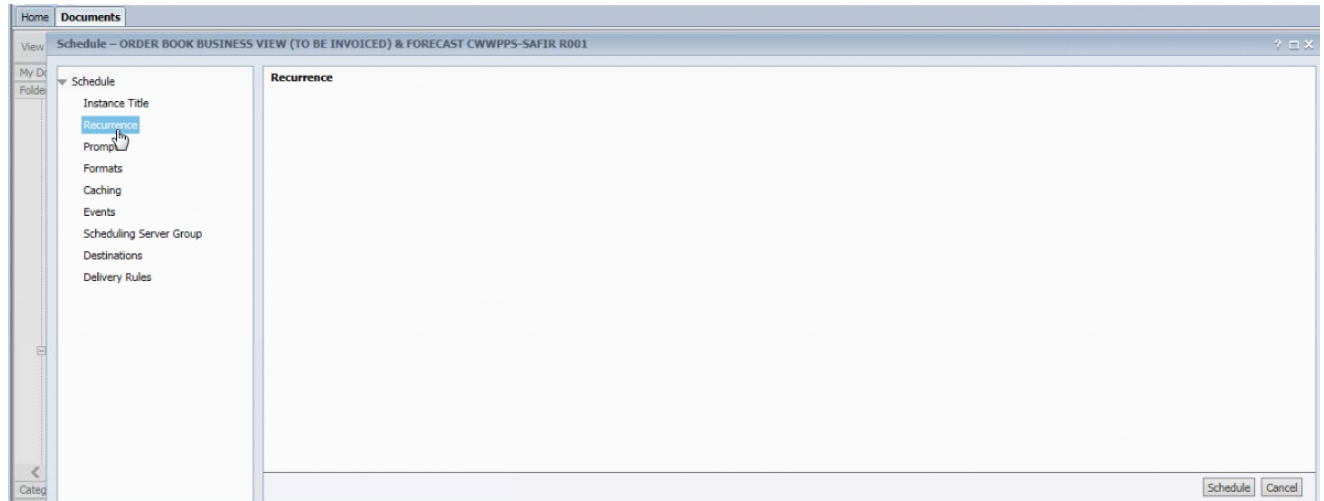

- Navigate to the report for which broadcast has to be created.

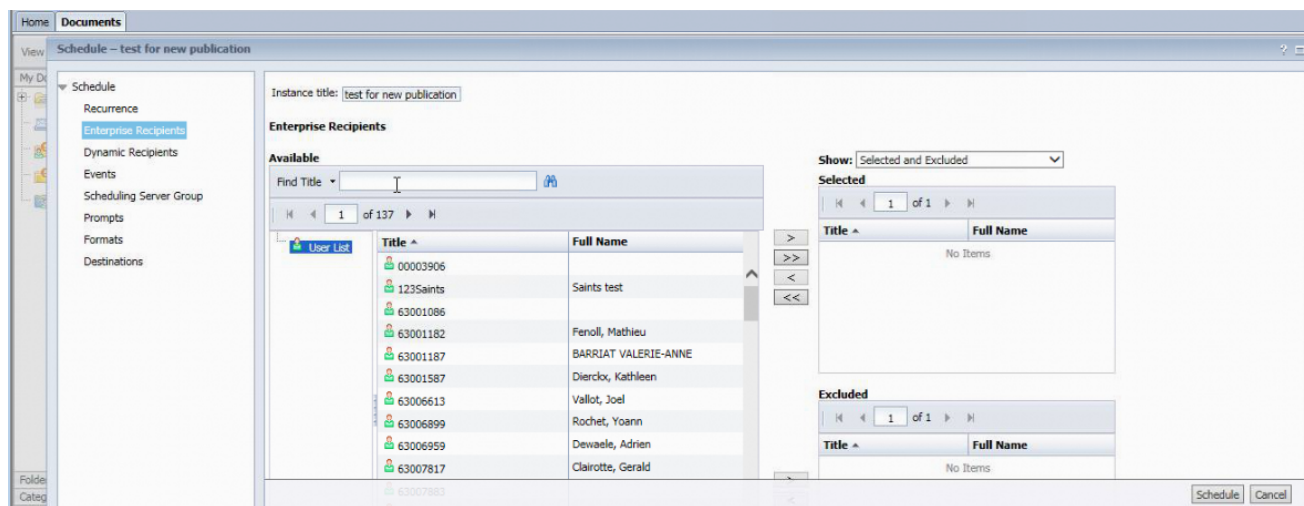

- We need to navigate to each section and give values as per the user's request.

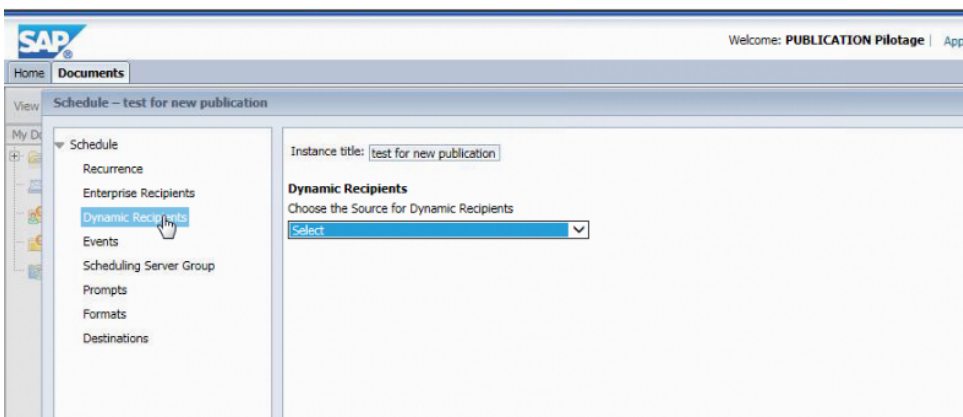

- Under recurrence tab, give values of when the recurrence of the report has to be happened.

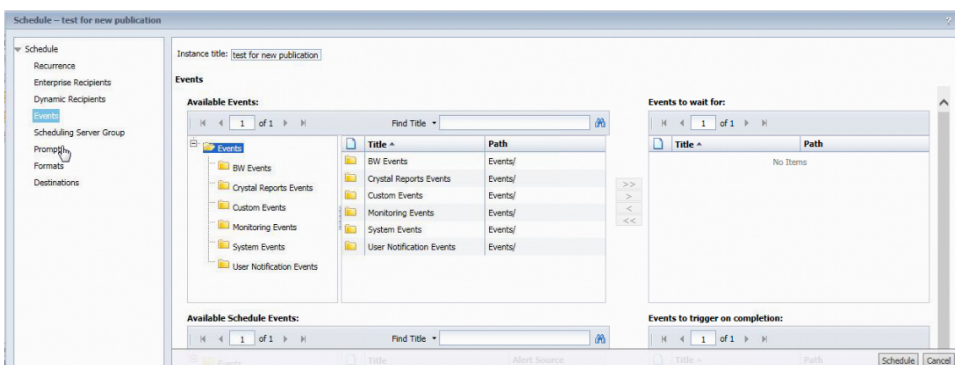

- Add Enterprise recipients, add the Email of the user's to whom the report has to be distributed.

- Under dynamic recipients, choose the source for it if requested.

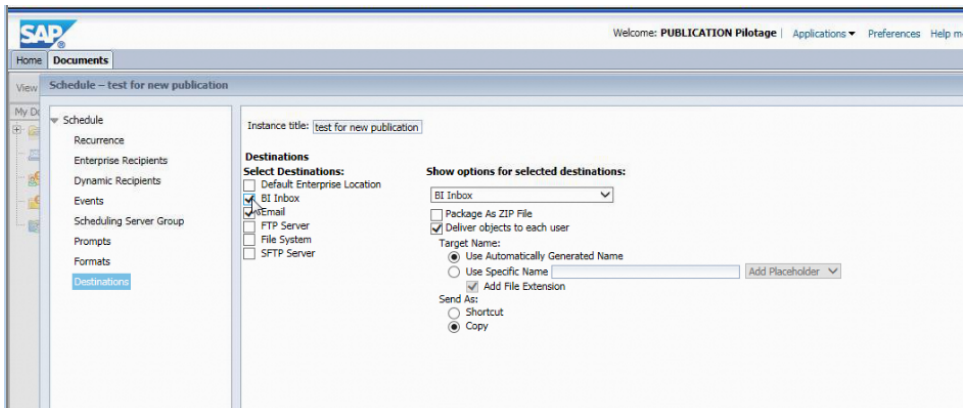

- Events are not handled by us in this process.

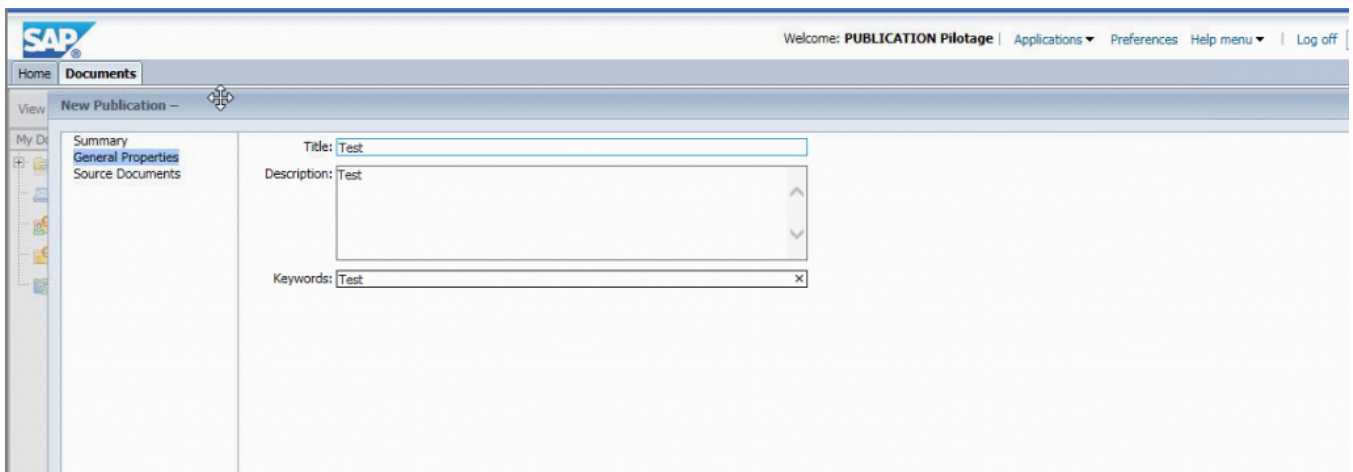

- Choose the Prompts value as requested. In order to modify click on Modify button.

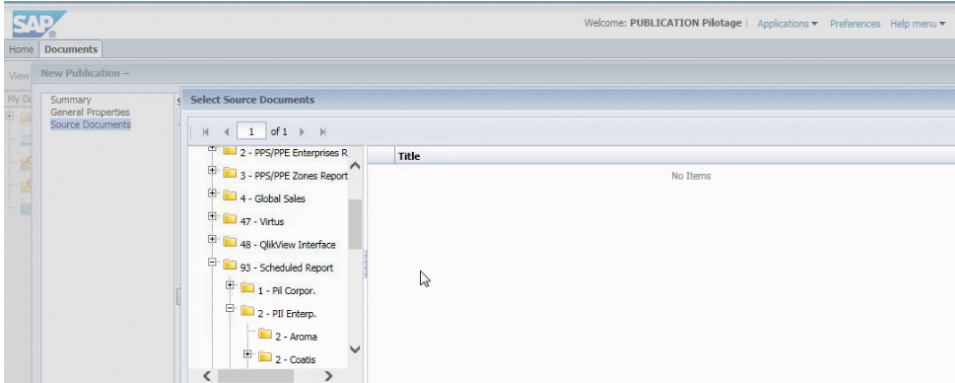

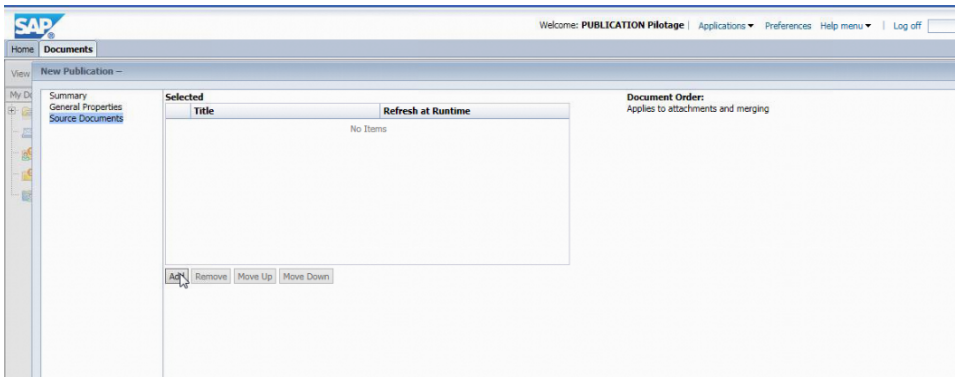

- Under destinations, we need to add the email recipients.

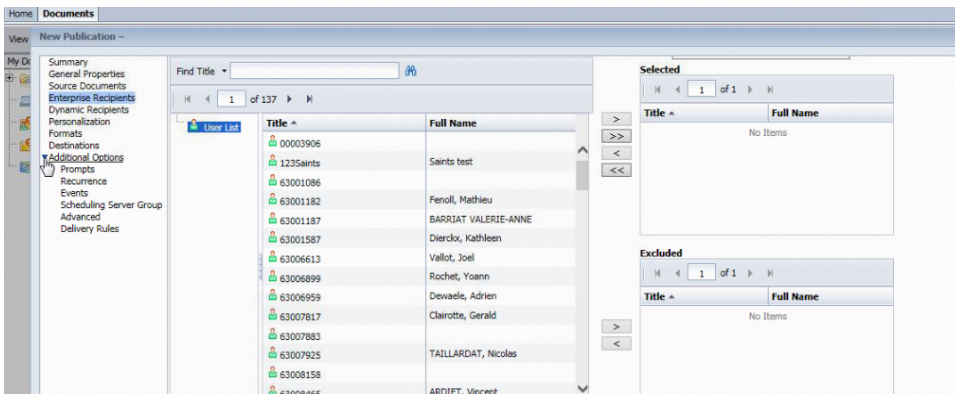

- Under General properties tab, provide the details of title, Description etc.

- Under Source Documents tab, add the source document by clicking on Add button. Navigate to the Web Intelligence report for which instance is being created.

- Give details and values for Additional options

- Under Delivery rules tab, we can provide triggers of when to deliver the report.
