[The scope of SPS project is increasing because we found more complexity.](#)

Marielle MOINET posted on Nov 01, 2016

We are postponing the **go-live of the project SPS to January 2018** as agreed during the last steering committee held on October 17th.

For your information, postpone the Go-live in this case means that we are finding **more complexity and that's why we are increasing the scope of the project.**

In this context, **2 critical actions** will be done still this **year 2016**:

1. Integrated test for the current design.
2. Determine the Cost Estimate issues and clarify the master data rules.
