

2016 09 - New Tridion version

Issues to be solved

Following this release deployment, some issues were raised. Here they are, including the information allowing to deal with it until it is solved:

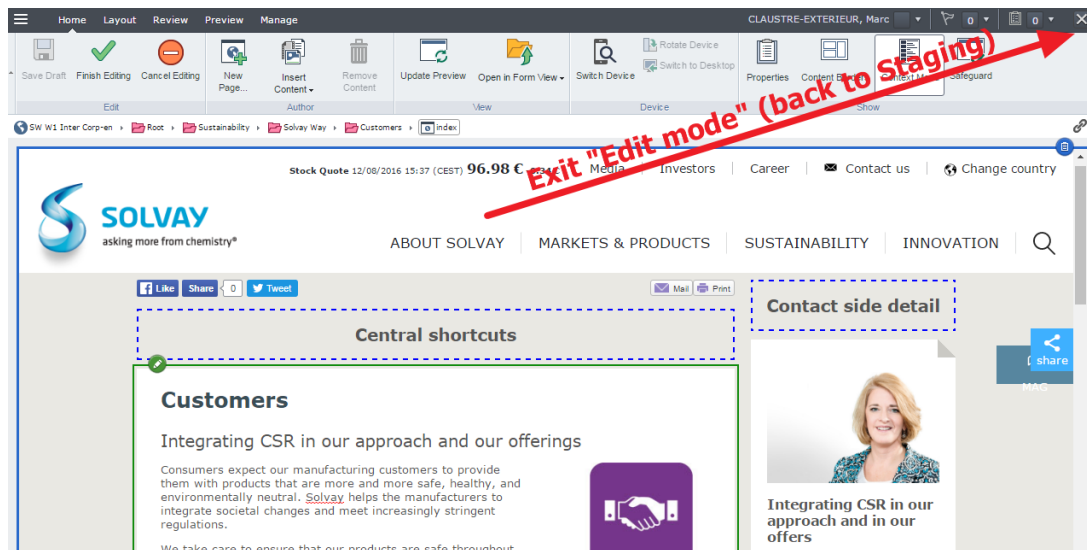

- "New page" button disabled
- Impossible to upload a file as a rich text hyperlink target
- Impossible to upload a file as a Press release or Download attachment

Since 2016 September 5, all the Solvay websites (Solvay ONE, Internet Corporate and Country sites, Webfactory sites) are running on a new Tridion version.

The main purpose of the release is a user interface reactivity and global stability improvement. Out of this, some few things are changing in the way you work with Tridion. Here they are:

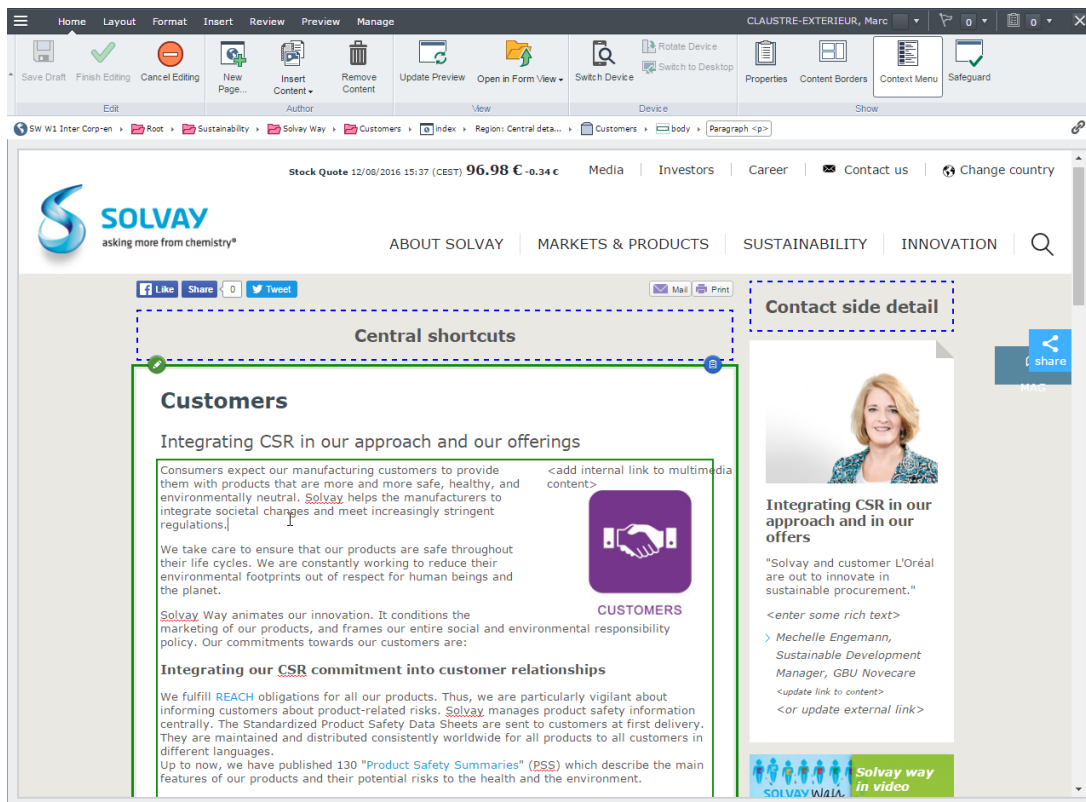

- New way to exit the "Edit mode" (back to Staging)
- Flat design user interface refresh
- Old Back-office url inactivated

New way to exit the "Edit mode" (back to Staging)

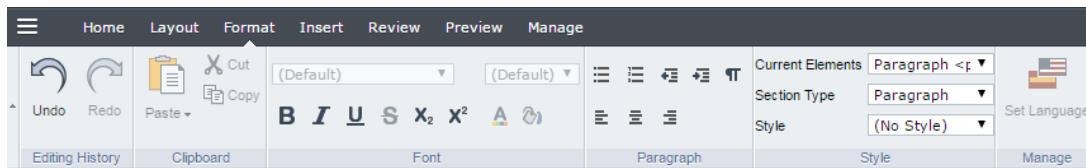

Flat design user interface refresh

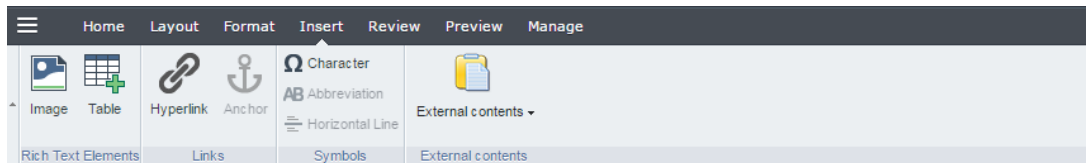

New user interface design:

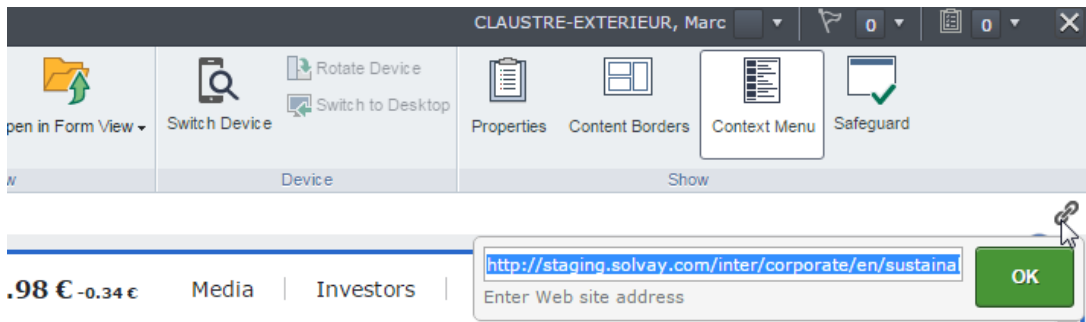

New rich text "Format" toolbar:

New rich text "Insert" toolbar:

Easily get the Staging link of the page you are currently editing:

Old Back-office url inactivated

Apparently, some of you still used the old <http://contentmanager.priv.rhodia.com> address. It is now inactivated.

The url to use is: contentmanager.solvay.com

We sincerely hope you will appreciate this new Tridion release.
