

No more "SDL Tridion" button in a single page of the Staging

Problem

In the Staging, on a single page, the SDL Tridion doesn't appear. Generally, this case come with another problem: the concerned page is not fully displayed, cutted. In this case, the page was "broken" by a wrong link. The implied link, if it was correct, would be displayed just after the latest part displayed into the page.

Solution

Common reasons for a "wrong" link:

- In a Spotlight, the "Link label" and "External link" fields was inverted:

Link to Tridion page:

External link:

Information Security - SBS InfoSec Policies

Link label:

<https://sites.google.com/a/solvay.com/solvay-information-security-policies/home?pli=1>

- Space at the beginning or at the end of the url:

Link:

Link to Tridion page:

External link:

<http://teamsites.solvay.com/sites/sleet/Basics/Forms/SolvayPositionPapers.aspx>

Link label:

There is a space here
