

# How do I disable/enable auto-translation?

In order to disable / enable auto translation, go to the the top of the page. There is this toggle option "Disable Auto Translation" / "Enable Auto Translation". Just simply click on the option and at will toggle the action.

Procedure	Screenshot
Screenshot with the auto translation enabled.	 A screenshot of the Solvay website header. At the top right, there is a navigation bar containing the text "Welcome Test-Normal", a button labeled "Disable Auto Translation" (highlighted with a red box), a language selector "English", and links for "Help" and "Logout". Below this, the Solvay logo is on the left, a search bar in the center, and the "Got it! Where ideas meet." logo on the right. A red arrow points upwards to the "Disable Auto Translation" button. A blue navigation bar at the bottom contains "Home", "Challenges", and "My Activities" on the left, and a home icon and "Solvay" dropdown on the right.
Screenshot with the auto translation disabled.	 A screenshot of the Solvay website header, similar to the one above. The button in the top right navigation bar is now labeled "Enable Auto Translation" and is highlighted with a red box. A red arrow points upwards to this button. The rest of the page layout, including the Solvay logo, search bar, and bottom navigation bar, remains the same.
