

Macro - Children display

 Use the Children Display macro to list the child pages of a page and the further descendants (children's children).

By default, the macro displays links to the child pages as shown in the screenshot below. People viewing the page will see only the links for pages that they have permission to view.

Children Display

List all the children of a page (and possibly their children)

This is the Children Display macro

Parameters

1. **Parent Page:** Specify the page to display children for, from either the current space or a different space. *By default : current*
2. **Number of Children:** Restrict the number of child pages that are displayed at the top level.
3. **Depth of Descendants:** Enter a number to specify the depth of descendants to display. For example, if the value is 2 , the macro will display 2 levels of child pages.
4. **Heading Style:** Choose the style used to display descendants.

Show Descendants

Parent Page

If not specified, the current page is used.

Number of Children

If not specified, no limit is applied.

Depth of Descendants
