

Confluence - Share

You can use the **'Share'** option in Confluence to email anyone a link to a page or blog post. The recipients can be Confluence users or any email address(es).

To share a link to a Confluence page [blocked URL](#)
or blog post:

1. Go to the page or blog post you wish to share
2. Choose **Share**
3. Enter a username, group or email address, and select the appropriate user, group or email address from the list of suggestions
Repeat this process to add multiple recipients to the list.
4. Enter an optional message into the **Note** box
5. Choose **Share** to send the link via email
