

Using the editor

The editor allows you to **enter** or **change the title** of your page; **insert content** including text, images, and links; and format your content using the toolbar.

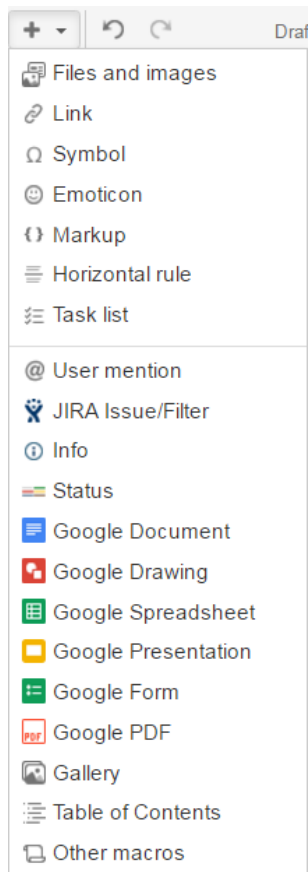

Editor toolbar

The editor toolbar is where you format your page layout and text, and add [links](#), [tables](#), [attachments](#) and macros. You can also perform a find and replace, or get help using the editor by choosing the help icon [blocked URL](#).

The Insert menu

Use the **Insert** menu to include any of the following content types on your page:

- An image
- A link to another Confluence page or external URL, or a link to an attachment or image
- An emoticon or symbol, or a horizontal line
- A macro (choose a specific macro, or **Other Macros**, from the **Insert** menu)

Restrictions, labels

When editing a page, you may want to

set **restrictions**  on who can view or edit the page, or add **labels**  to the page to make it easily searchable.
