

How to add Images (Header, Text, Teaser)

All images must be selected from Keepeek library.
You need to first upload your image in Keepeek so that you are able to use it on the website.
We also recommend you to follow the [Guidelines to name images in Keepeek](#).

Header image

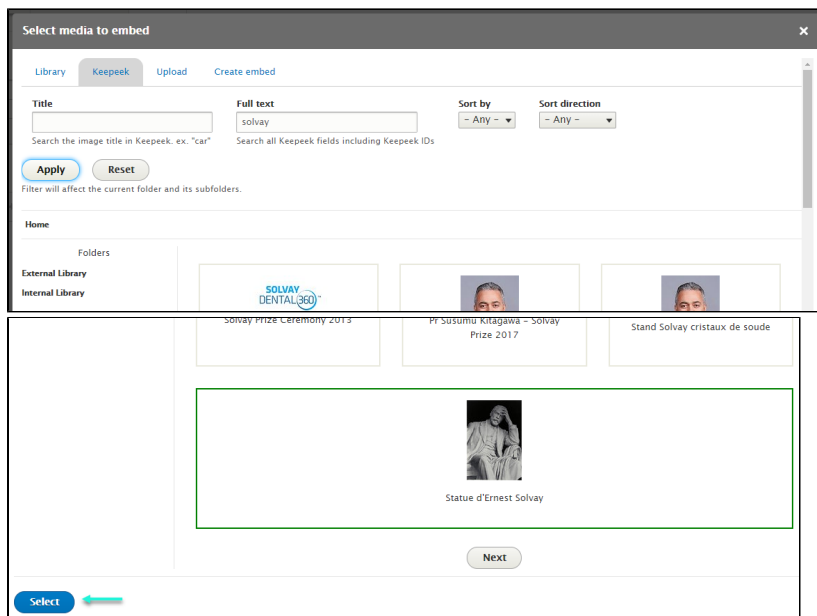

A header image will be displayed as a banner at the top of page.
If no image is provided, there will be a dark background by default.

When editing you will see a "Header image" option, simply open and choose your picture from the Keepeek library.
You may easily find it through the search bars.

blocked URL

If needed you can resize your image. To do so, after uploading click on "Edit".

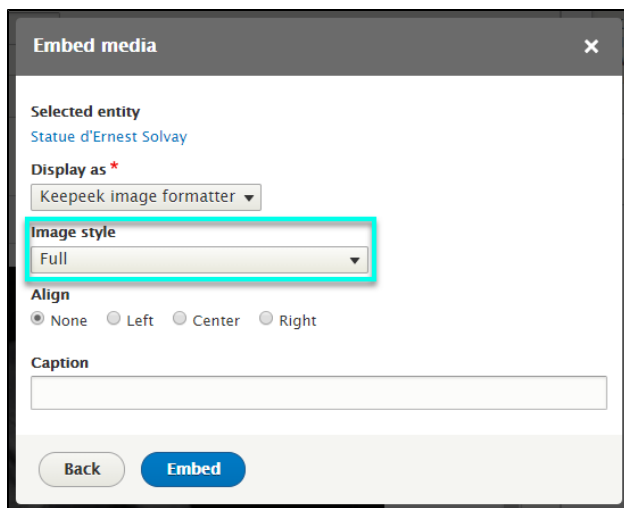

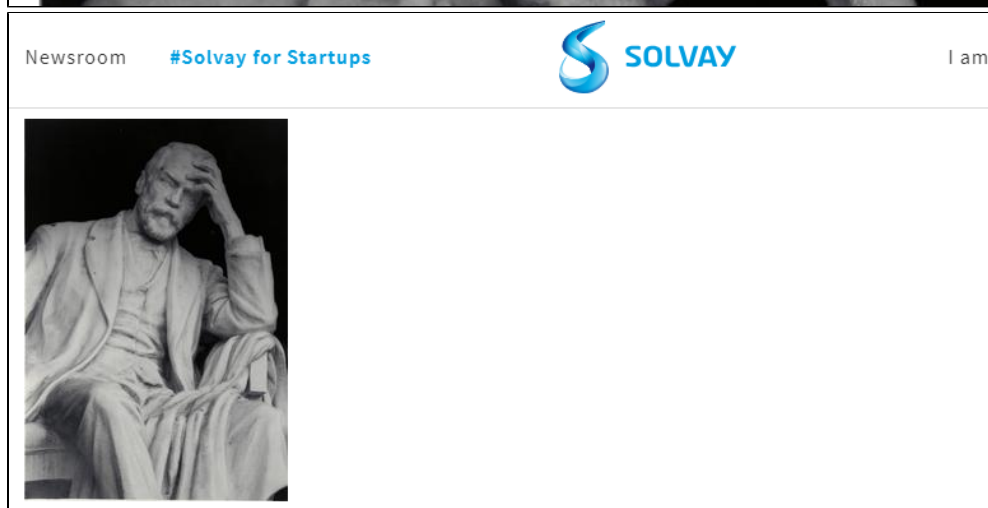

If you need to add a caption below the image, fill in the "caption" field" after selecting your image.

Also, once embedded you can still edit the image to fit better in the text.

For example, the "Full" image style will apply the original size of the picture so you can reduce it by updating the field "Image style".

To open this menu simply double-click on top of the image.

Teaser image

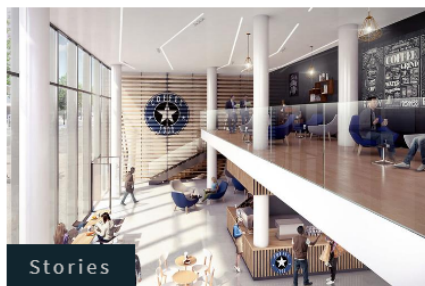

The option to add a Teaser image will only be available for Press releases and News/Stories content types.

You may add a specific image displayed as a teaser in the newsroom list.
It can be different from the one used in the banner.

When editing you will see a new tab next to "Header" and "Body" which is called "Teaser".
