

BASF-YPC acrylates units undergo maintenance

Released on 10/12/12

BASF-YPC Co plans to close its acrylic acid (AA) and acrylate esters plant in Nanjing, China in Jan 2013 for a three-week turnaround. The firm runs a 160,000 tonne/y crude AA plant, a 60,000 tonne/y glacial AA plant, a 55,000 tonne/y methyl methacrylate/ethyl acrylate swing plant, and a 100,000 tonne/y butyl acrylate plant in Nanjing.
