

FMC Corporation Signs Licensing, Distribution and Services Agreements with GAT Microencapsulation AG

Released on 17/12/12

FMC Corporation (NYSE: FMC) announced today that its Agricultural Products Group has signed a perpetual, global licensing agreement, along with distribution and services agreements with GAT Microencapsulation AG covering a range of advanced crop protection products and proprietary formulation technologies.

Under the agreement, FMC will access GAT Microencapsulation AG's complete library of intellectual property, which includes a portfolio of registered products, proprietary formulation technologies, and new products in development. FMC will be the main distributor of GAT Microencapsulation AG's current product portfolio in virtually all global markets. GAT Microencapsulation AG will supply the products to be sold, as well as new materials for products FMC commercializes in the future. Terms of the agreement were not disclosed.

"Over the years, FMC's innovation and collaboration initiatives have delivered impressive crop protection technologies. We are pleased to be adding to our portfolio GAT Microencapsulation's products and proprietary formulation technologies. With their research and development expertise, product registration experience, and key location in central Europe, we have found an important new strategic partner that will help us achieve our Vision 2015 goals," said Mark Douglas, president, FMC Agricultural Products.

About GAT Microencapsulation AG

GAT Microencapsulation AG is an agrochemical company specializing in the development, registration and manufacture of advanced plant protection products. GAT has developed innovative and cost-effective technologies for the formulation of agrochemicals, most notably microencapsulation. The company's intellectual property in these technologies is based upon a complex combination of international patents.
