

EVA plant operated by Sumitomo Chemical at lower rates

Released on 18/12/12

Sumitomo Chemical Co. is operating its ethyl-vinyl acetate (EVA) plant at curtailed rates.

A Polymerupdate source in Japan informed that the plant is currently operating at 80%-85% of production capacity.

Located at Ichihara in the Chiba prefecture of Japan, the plant has a production capacity of 20,000 mt/year.
