SAMPLE Russia's overall exports of fertilizers increased in January-September 2012, the country's customs agency said on Monday. Russia's exports of nitrogen fertilizers were 2.4% up year on year in January-September, at 8.27m tonnes, the Federal Customs Service of Russia said in a statement. The export value was reported at \$2.63bn (€2.1bn), it said. The country's potash exports were 11.8% up year on year at 6.01m tonnes, valued at \$2.46bn, the statement said. Russia's exports of mixed fertilizers were 14.5% up year on year at 6.75m tonnes, or \$3.1bn.
