

SM plant planned to be restarted by Lotte Chemical

DATE : 2013-09-27

Lotte Chemical is in plans to restart its Styrene monomer (SM) plant following maintenance turnaround. A Polymerupdate source in South Korea informed that the plant will be restarted in H2 October, 2013. It was shut on September 23, 2013 for maintenance turnaround. Located in Daesan, South Korea, the plant has a production capacity of 560,000 mt/year.
