

BASF Butyl Acrylate sales control in place until end of September

DATE: 2013-08-28

Butyl Acrylate (butyl-A) sales control at Germany-based chemicals major BASF will remain in place until the end of September, a source from the company said on Wednesday.

"It will be extended during the entire month of September," the source said.

BASF implemented force majeure on butyl-A on 13 June because of production problems at its 110,000 tonne/year Ludwigshafen facility in Germany. It was lifted on 21 June and sales control was put in place.
