

# SM plant likely to be restarted by Denka

DATE : 2013-07-27

Denka is in plans to restart a Styrene monomer (SM) plant.

A Polymerupdate source in Japan informed that the plant is likely to be restarted next week. It was shut owing to a fire at its complex on July 20, 2013.

Located in Chiba, Japan, the plant has a production capacity of 270,000 mt/year.
