

# Test runs to be commenced at SM plant of SP Chemicals

DATE : 2013-07-05

SP Chemicals is in plans to start test runs at a new Styrene monomer (SM) plant in China.

A Polymerupdate source in China informed that test runs at the plant will begin in late July-early August 2013.

To be located in Jiangsu province, China, the plant has a production capacity of 320,000 mt/year.
