

Lucite International plans to be back online with MMA in July

DATE : 2013-07-05

Major European methyl methacrylate (MMA) producer Lucite International plans to be back online from its planned outage later in the month, a source from the company said on Friday.

Lucite International put its customers on sales control in June and the allocation will remain in force until 31 July, as previously communicated, the source said.

The company has the capacity to produce 200,000 tonnes/year of MMA from its Cassel site at Billingham, in Teesside, England.
